## PREREQUISITES:

First-year students only.

## DESCRIPTION:

This seminar is designed to investigate how the concept of race has been represented in cinema historically, with a particular focus on representations of race when blackness is masqueraded. Its intent is to launch an investigative inquiry into how African Americans are represented on screen in various time periods, how we as spectators are manipulated by these cinematic constructions of race, and how race is marked or coded other than through visual representation. Students will view films that deal with ¿passing¿ from the various historical periods and will utilize theoretical concepts introduced in class to read these visual representations. Films selected for viewing include the pre-World War II Era, the Civil Rights Era, and the ¿Post-Racial¿ era. Students will be required to write three papers that reflect their ability to apply theoretical concepts to reading racialized representations on screen in

## PREREQUISITES:

First-year students only.

## DESCRIPTION:

This seminar is designed to teach students how to navigate new intellectual terrain and process unfamiliar information from a variety of disciplinary perspectives with an emphasis on simulations, field study, reflections, and documentation. Each student will plan, implement, and document an individual short journey. This voyage of discovery on the campus or in the surrounding community will be chronicled with a documentary journal and presented to the class in a multi-media format that conveys the individual's perspective, journey, and discoveries. Additionally, the class will collaboratively plan, implement, and document a common full day journey. This required field study will be a core aspect of the experiential education connection for the course.

## PREREQUISITES:

First-year students only.

## DESCRIPTION:

By AD 1200, most Southeastern Indians were farmers who lived in societies ruled by hereditary chiefs. After 1500, encounters between Indians and Europeans changed the lives of all concerned, but the changes took place in, and were shaped by, existing cultures. This seminar uses reading, discussion, and lecture to examine the lives of Southern Indians and to understand how encounters and interaction with European explorers and colonists changed the worlds in which the Indians lived. Students will learn how archaeologists and historians work, both separately and together, to study the past of Native societies. Students will study and analyze archaeological artifacts, Spanish accounts of Southeastern Indians, and other primary materials in class. These activities, along with various role-playing exercises, will directly involve the students in the study of Native people in the period between 1200 and 1800. Grades will be

AMST101 is an interdisciplinary examination of two centuries of American culture, focusing on moments of change and transformation. Wevwill take advantage of the strengths we have in the Department of American Studies (American Indian and Indigenous Studies, Folklore, Digital Humanities, Global American Studies and Southern Studies) and of our regional space in general. Materials will include literature, documentary and fiction film, and visual culture, in addition to works of social and cultural history. Required readings: Common Ground: Reimagining American History (Gary Okihiro, 138p); Crafting an indigenous nation : Kiowa expressive culture in the progressive era (Jenny Tone-Pah-Hote, 102p); The Marrow of Tradition, Bedford Edition (Charles Chesnutt, 200p plus additional essays and primary documents); Gamer nation : video games and American culture (John Wills, 234p); and Gone Girl (Gillian Flynn, 419p)

An examination of Southern cultural identity, literary imagination, and sense of place with an emphasis on the fiction, folklore, foodways, art, architecture, music, and material culture of the American South.

In the past, to discuss the South, we would first define the borders of the region, and theorize about what makes the South distinctive. The {old} map of the South traditionally referred to the eleven states of the former Confederacy, but today, these rigid borders are more fluid. The South {is found wherever southern culture is found,} existing {as a state of mind both within and beyond its geographical boundaries.} Beyond the question of what constitutes the South{s borders, a new vision of Southern Studies challenges conventional tropes of southern identity. The {new Southern Studies} considers landmarks of southern identity other than the Civil War, Reconstruction, and barbecue. Rather than the old {white} and {black} South, a new Southern Studies recognizes the diverse communities, cultures, and ethnicities of the South, where global influences have shaped the region in powerful ways for centuries.

This semester, {The Ethics of Stand-Up Comedy} will explore the historical, sociocultural, and civic significance of twentieth and early twenty-first century stand-up comedy in the United States. We will consider comedy as public voice; examine the ways humor constructs and disrupts American identities; and discuss the ethics of the creative process, performance and reception in contemporary life. Our syllabus will include scholarly articles to guide our study, but we will focus on the performances of comedians: Moms Mabley, Phyllis Diller, Joan Rivers, Lenny Bruce, Richard Pryor, Margaret Cho, Mitch Hedberg, Louis C.K. (yep), Chris Rock, John Mulaney, Gabriel Iglesias, Wanda Sykes, Sarah Silverman, Aparna Nancherla, Carmen Esposito, Tig Notaro, Hari Kondabolu, Hasan Minhaj, and Maria Bamford, among many others.

This course traces the development of Cherokee philosophy and thought, beginning with an exploration of the Southeastern Ceremonial Complex and its stories. From the time of European contact, we progress through modern literary texts and lectures about how Cherokee people have conceived of the world. We will explore the bases of Cherokee thought and apply that understanding to analyzing texts by Cherokee authors. Students will gain a deeper understanding of Cherokee culture and society by exploring the stories and beliefs that have been important over time.

"The Challenge of the American Century in Europe"

In this course, we will:

1. Categorize and describe the major events, developments, and forces that gave rise to the expansion of American culture and soft power in Western Europe during the 20th century; 2. Critically reflect on the ways in which relations of power in international affairs, domestic society, and categories of race, class, and gender, shaped European adoption, adaption, and rejection of American values; 3. Question and analyze the concepts of (cultural) imperialism, soft power, and Americanization.

This course will explore the various and sometimes contradictory ways in which American identity has been constructed since the Civil War, with a particular focus on race, indigeneity, and the relationship between citizen and state. We will examine a series of case studies, from the cultural impact of the European diaspora to Native American military service and the internment of Japanese-Americans during World War II, with each providing new insights into how Americanness is produced and the political work that it performs. This course will help us better understand the present-day immigration debate and contextualize it within a larger historical discourse.

"The African American encounter with Europe"

In this course, we will:

1. Categorize and describe the major events, developments, and forces that shaped the African American presence in and encounter with Western Europe during the 20th and 21st centuries; 2. Critically reflect on the significance of differences and similarities in the ways that Americans and Western Europeans defined categories of race and blackness; 3. Question and analyze the ways in which African American encounters with Europe shaped (anti-)racism on both sides of the North Atlantic.

del norte a norte: An American Songbook

Through the examination of a wide variety of song cultures and its artistic and cultural expressions, we explore the interdisciplinary methods of American Studies and contemporary approaches to the study of American society and cultures, with an emphasis on musical performance. Students will learn about the sociocultural, aesthetic and critical components of song cultures associated with social change, exploring issues of identity, diversity, privilege, cultures, and justice while participating in community service.

Some seats are reserved for First-Year and Sophomore students.

"Feeding Diaspora: Telling Global Food Stories"

As new audio storytelling projects have emerged across the global media landscape, audio has become a rich, intimate, experiential way to tell nonfiction food stories. In this class, we'll take a close look at contemporary multimedia food journalism and storytelling. Spanning written, audio, and visual styles, we'll explore how food can be used to tell complex, vibrant stories that reflect migration and cultural exchange. And because audio is also a critical component of video and forms of documentary storytelling, students will learn how audio can be used to transform a good story into an amazing story.

Professionalization in the Public Humanities: Making Scholarship Public in History, Theory, & Practice

The purpose of this course on public humanities scholarship is to prepare graduate-level humanists for socially impactful careers, either within the academy in diverse contexts, or beyond. Students that enroll will build capacity for individualized public scholarship agendas in their teaching and research, alongside building a collaborative public project to debut at the Spring 2020 Humanities for the Public Good symposium.

## PREREQUISITES:

First-year students only.

## DESCRIPTION:

By AD 1200, most Southeastern Indians were farmers who lived in societies ruled by hereditary chiefs. After 1500, encounters between Indians and Europeans changed the lives of all concerned, but the changes took place in, and were shaped by, existing cultures. This seminar uses reading, discussion, and lecture to examine the lives of Southern Indians and to understand how encounters and interaction with European explorers and colonists changed the worlds in which the Indians lived. Students will learn how archaeologists and historians work, both separately and together, to study the past of Native societies. Students will study and analyze archaeological artifacts, Spanish accounts of Southeastern Indians, and other primary materials in class. These activities, along with various role-playing exercises, will directly involve the students in the study of Native people in the period between 1200 and 1800. Grades will be

TITLE: By Persons Unknown: Race and Reckoning in North Carolina

GEN EDS: HS, US

## PREREQUISITES:

First-year students only.

## DESCRIPTION:

"By persons unknown" is the phrase historically used across the white South to erase the identities of the killers responsible for lynchings. Though communities certainly knew who these murderers were, the press and the courts publicly denied this knowledge, offering the killers a cloak of anonymity.

Design thinking is a popular buzz term in this age of Kickstarter, instant turnaround, and short time-to-market. But what is design thinking really all about? In many ways, it is a process that most of us were quite familiar with in our preschool years. Observe an opportunity. Take an action. Assess the results. Laugh at the failures. Repeat. Design is not just for artists and engineers - we are all designers!

But how do we get back to that pure form of design thought? In this class we will explore design through active making, discussion, presentation, and self-evaluation. Starting with the most basic of materials, we will exercise our latent creativity muscles and exorcise the constrained thinking and other obstacles engrained in us by "traditional" education. In this class, "failure" is an important concept that will be embraced and even celebrated. Science, entrepreneurship, and life itself is a process of try and try again. We must accept and learn from failure in order for "try" to become "do" and for "do" to lead to success.

APPL	290	01	13329	TOPICS APPLIED PHYSICAL SCNCS Lecture			3	A
(Face to Face Instruction)								
Bldg: Hanes Hall		Room: 0112		Days: TuTh	Time: 09:30 - 10:45	MATERIALS SCI & ENGI INST	100	Instructor: DINGEMANS, THEODORUS J

GR1

This course will be an introduction to topics in materials science and with a strong focus on materials, processing and engineering and how design plays a pivotal role in materials selection. A central theme will be in-class demonstrations and hands-on experiments so you will experience first-hand why materials do what they do and how to select the appropriate material for the right application. It's a materials world after all!

Prerequisite, CHEM 102; PHYS 116 or 118.

APPL	290	02	13332	TOPICS APPLIED PHYSICAL SCNCS Lecture			3	A
(Face to Face Instruction)								
Bldg: TBA		Room: TBA		Days: MW	Time: 14:30 - 16:25	SENSORS & ELECTRICAL INST		100
Instructor: GOLDBERG, RICHARD L								
Class Enrl Cap: 16		Class Enrl Tot: 6		Class Wait Cap: 0		Class Wait Tot: 0		Class Min Enrl: 0

GR1

This course meets in Kenan Labs B030.

The course will have an active learning format. For most class sessions, we will start by learning new material, and then transition to hands-on laboratory exercises to reinforce these new concepts. There will be a final project in which students design and develop a system that measures a parameter, and acquires and analyzes the resulting signal on the computer.

Prerequisites: ONE of the following PHYS 105, 115, 117, 119

APPL	390	001	11381	TOPICS APPLIED PHYSICAL SCNCs Lecture	3		A

				Class Min Enrl:0			

GR1

This course earns 3 credit hours for Spring 2019. When enrolling for this course, please select 3 credit hours.

Instructor approval is NOT required for this course. Please disregard the ConnectCarolina description that says it is.

Take-home and in-class activities, group discussion and problem-solving coaching will enhance student understanding of how chemistry, physics, materials science and biology are applied to engineering. There will be special focus on BioEngineering, Chemical, Mechanical and Environmental Engineering. Discussions of relevant scientific literature introduce each topic. Guest lecturers and faculty will provide perspectives in fields like mathematical modeling, mechanical engineering or circuit design so students gain a true interdisciplinary view of topics.

APPL	412	001	10454	MAKING IDEAS INTO REALITY Lecture	3		A
(Face to Face Instruction)							
Bldg: Phillips		Room: 0208		Days: TuTh	Time: 14:00 - 15:15	INST 100	Instructor: GOLDBERG,RICHARD L
Class Enrl Cap:20		Class Enrl Tot:13		Class Wait Cap:0		Class Wait Tot:0	
				Class Min Enrl:0			

GR1

Do you have an entrepreneurial idea and you would like to make a prototype to turn your idea into reality? Or do you want to experience the design and making process? In this class, you will go through this process for a semester-long project. The final outcome will be a prototype that meets an entrepreneurial need.

The pre-requisite is APPL110 or permission from the instructor for those who have significant experience in the BeAM Makerspace of something equivalent. Orientation in the BeAM Makerspace is required. Students from any major are welcome to take this class.

You do not need to have an entrepreneurial idea before taking this class. You will work in groups to identify entrepreneurial ideas, which could emerge from discussions with people in the UNC community, local community, or around the country. From these ideas, you will choose a topic for your semester project, and then start working with your group on different designs, getting feedback throughout the process. By the end of the semester, you will fabricate a

GR1

What kind of material is Sponge Bob made of? Or, what about the slime of his pet snail, Gary? We are taught that there are three states of matter: solid, gas, and liquid. However, in our daily lives we encounter materials that challenge this simple description such as foams, pastes, gels, soap, and rubber. These are Soft Materials and in this course we will learn about their special properties.  
Prerequisites: To be determined

## PREREQUISITES:

First-year students only.

## DESCRIPTION:

This course explores Gothic church and secular architecture in France and Europe between 1130 and ca 1450. We will focus not only on the formal and constructive progresses in architecture during this period, but also on the social, political, and economic aspects of medieval society that affected all these developments. Case studies will integrate the churches full array of stained glass windows, as well as the plethora of sculptures embellishing the colossal portals of these buildings.

Students will combine the study of architecture with the study of medieval culture, exploring for example the impact of the cult of saints, princely courts

TITLE: World's Fairs: Back to the Future!

GEN EDS: HS, CI, US

PREREQUISITES: First-year students only.

## DESCRIPTION:

This seminar uses U.S. World's Fairs, examples of constructed images of the modern city to investigate the changing image of 'America'. We selected six U.S. World's Fairs between 1893 and 1965 (1884 World Cotton Centennial, New Orleans; 1893 World's Columbian Exposition, Chicago; 1904 Louisiana Purchase Exposition, Saint Louis; 1939 New York World's Fair, New York City; 1962 Seattle World's Fair; 1964/1965 New York World's Fair, New York City). By examining

TITLE: How Do We See?

GEN EDS: PH

PREREQUISITES:

First-year students only.

DESCRIPTION:

We will explore how we see in two senses. In the first, literal, sense we will explore the physics of vision and how it allows us to perceive the location and size of objects as well as their color. In the second, metaphorical, sense we will explore visual artifacts and how objects are represented in

Topic: American Art and the Globe

Focusing on the global dimensions of modern American art, this course teaches students to critically read, research, and write art history at an advanced level. Seminar sessions will examine the encounters, exchanges, and circulations of people and things across boundaries and oceans from the 1850s to WWI. We will consider the artifacts of exploration, imperialism, and trade; transnational figures of the art world, from cosmopolitan travelers to political exiles; and the artistic culture of major transcultural sites, from Melville's whaling ports to San Francisco's Chinatown. Students will also be guided through completing a term-long independent research project on a single work of art. While these projects may extend beyond the artworks, artists, even period covered in the course, they should deal in some way with art history and globalization and with America's relation to the world.

What is a landscape? When, where, how, and why does landscape become a pictorial genre? This seminar investigates the development of landscape in Western pictorial traditions and its transformations over time, focusing primarily on theories, practices, and interpretations of landscape painting from the fifteenth through the mid-nineteenth centuries, both in western Europe and, in the late-eighteenth and nineteenth centuries, the Americas. We will consider what have been defined as key moments and changes in the conception, depiction, and reception of landscape in Western painting to circa 1850 and the ways in which critics and historians have isolated, interpreted, and represented these developments.

ARTS 105H.001 | Basic Photography

TR, 11:00 am - 1:45pm. Instructor(s): Joy Drury Cox. Enrollment = 15.

In ARTS 105H Basic Photography you will be introduced to the basic techniques of digital photography. Both technical and conceptual applications of image-making will be explored. This course seeks to develop an understanding of the mechanics, visual language, and history of the photographic medium. Specifically, we will work with digital photographic practices, learning the fundamentals of DSLR cameras, Adobe editing software such as Photoshop and Bridge, inkjet printing, and basic digital workflow and file management. In conjunction with your studio practice, you will also learn about the medium's rich history.

Assignments will be supplemented with readings, films, library, and museum visits. Over the course of the semester, you will be exposed to a variety of examples of historical and contemporary photography. In the classroom you will be exposed to technical demonstrations, lectures, discussions, critiques,

## PREREQUISITES:

First-year students only.

## DESCRIPTION:

In this course, we will explore the various ways that wars and conflicts, particularly Iran-Iraq, U.S.-Iraq, and U.S.-Afghanistan wars, have been portrayed in literature, film, and photography. We will attempt to deepen and enrich our understanding of war experienced by both veterans and civilians of each country. We will examine the impact of war on the human psyche in regards with violence. We will read books by American war veterans and Middle East authors contemplating the wars and their consequences. We will look at each writer's perspective on war and their interpretation of it comparatively. In order to enhance our understanding of the phenomenon of war, we will also read supplementary articles on criticism of war and a few on psychology of war. There will be film screening on these wars which will give students the opportunity to examine these wars in a different medium than just literature. We will also look

TITLE: Imagining Palestine

GEN EDS: LA, BN

## PREREQUISITES:

First-year students only.

## DESCRIPTION:

This course explores the idea of Palestine as it is presented in Palestinian writings, films, and other creative works. We will study what Palestine is for the Palestinians, none of whom have lived in a Palestinian state and many of whom have spent more time in exile than in the land that has been known

ASIA 255H.001 | The Feast: Food in Film, Philosophy, and Fiction

MWF, 9:05 am - 9:55 am. Instructor(s): Inger Brodey. Enrollment = 5.

While its individual form and content may differ greatly, the feast or banquet functions as a strong symbol in most global communities. Food and feasting often defines community by establishing a connection between those who eat, what they eat and how they eat: as such it shapes national and cultural identities. As it is portrayed in Western philosophy from the seminal banquet in the pages of Plato's Symposium, the feast is simultaneously erotic and philosophical. It has the potential to descend into gluttony or to rise to the level of the sublime. Feasting can represent communion or transgression, just as eating "the flesh" may symbolize one of Christianity's most central rites or one of Western society's central taboos. In Asia, the influence of Buddhist reincarnation has instilled additional meanings and taboos upon the consumption of food. The multiple purposes and nuances of food make it a rich theme in literature, film, and the visual arts. The food and banquet film has recently become a genre unto itself, and the outpouring of films are helpful in understanding cross-cultural differences in the social and philosophical understandings of what it is to be human. In addition to readings in philosophy, NOTE: Honors Carolina students register online when their registration appointment begins. Non-honors students register beginning November 18. If you are unable to enroll online, submit a wait list request at [honorscarolina.unc.edu/waitlist](https://honorscarolina.unc.edu/waitlist) between November 18 and January 2.

BIOL	102L	401	12739	INTRO BIOLOGY LAB RESEARCH	Lab	1	A
(Face to Face Instruction)							
This research-based lab introduces students to the process of science through collaboration on a research project, learning relevant techniques and scientific skills.							
Topics include identification of soil bacteria and isolation of natural products they produce.							
This lab can be taken in place of BIOL 101L and when taken with BIOL 101, counts as Communication Intensive credit. Counts as EE							
First years and sophomores ONLY.

BIOL 255H.001 | Evolution of Extraordinary Adaptations

M, 10:10 am - 12:05 pm. Instructor(s): Christopher Willett.

Of course you know that the Venus flytrap catches and digests insects, did you also know that it is native almost entirely to North Carolina? Extraordinary adaptations can be found in numerous other organisms as well. In class we will also look at the exceptional environmental stress tolerance of a tidepool copepod and the incredible foraging and growth potential of the tobacco hornworm caterpillar. For example, this copepod can survive freezing, high salinities, low pH, and anoxic conditions and these caterpillars can rapidly increase in mass by 10-fold at the end of development.

This class will conduct publishable research in evolution and ecology by doing actual science on the Venus flytrap, tidepool copepod, and hornworm caterpillars. We will attempt to answer unknown questions about adaptations in these systems by using techniques such as high-speed video analysis, environmental manipulation, and potentially genetic analysis. Through this course students will be totally immersed in how research is done. Students will be taught how to generate hypotheses, collect and analyze data in the R statistical programming language, discuss scientific literature, and publish their

(Face to Face Instruction)							
The purpose of BIOL 395H is to provide honors students with independent research experience, while working in a research lab on a question of current biological interest. Under the supervision of a faculty member, and with contribution of research postdoctoral fellows, students will learn more than just basic research techniques. They will learn how to start to think as scientists, raising hypotheses and finding ways to test them in an empirical manner. In addition to the research performed in the lab, honors students will meet with each other on a weekly basis, discuss their research and develop their scientific thinking through reading and discussing primary scientific literature.							
FOR BIOLOGY MAJORS ONLY. PREVIOUS ENROLLMENT IN BIOL 201 OR 202 REQUIRED. DEPARTMENT OF BIOLOGY PERMISSION REQUIRED; APPLICATION AVAILABLE IN 213 COKER HALL.							
BIOL 395H may be taken for no more than six graded academic credits. Three to five credit hours of research may be counted as one lecture course toward

		18-NOV-2019 RC PLAN UGRD HONORS		0		6	

NOTE: Honors Carolina students register online when their registration appointment begins. Non-honors students register beginning November 18. If you are unable to enroll online, submit a wait list request at [honorscarolina.unc.edu/waitlist](http://honorscarolina.unc.edu/waitlist) between November 18 and January 2.

BIOL 436H.001 | Plant Genetics, Development, and Biotechnology

TR, 11:00 am - 12:15 pm. Instructor(s): Jason Reed. Enrollment = 24.

Recent advances in plant molecular biology, genetics, development, and biotechnology, and their potential relevance to agriculture. The course will include lectures, reading and discussions of papers from the primary literature, and student presentations.

Prerequisites: Biology 271 or Biology 202 or permission of the instructor.

The course will focus on several themes that will illustrate methodological approaches and intellectual questions in plant biology. These themes may differ in different years. Each theme will be covered over several class periods (2-3 weeks). We will intersperse lectures and more focused class discussions centered on papers from the primary scientific literature reporting research findings. Students will:

i) learn about current methodologies and questions of scientific interest in plant molecular biology;

				(Face to Face Instruction)			
Enrollment is limited to one section of 14 students so that everyone can participate in the field.							
If you are interested in this course, please send an email to Drs. Sockman and Hurlbert (kws@unc.edu and hurlbert@bio.unc.edu) and write a short paragraph about your previous biology coursework, why you are interested in this course, and how it may or may not relate to your future plans. Include your PID.

BIOL	490	002	12832	ADVANCED TOPICS IN BIOLOGY	Lecture (Face to Face Instruction)	3	A
In this highly interactive, small-group course, we will read a series of scientific papers that elegantly demonstrated one of the molecular events that are fundamental to synaptic plasticity, a key mechanism of learning and memory. Students will not only become familiar with this exciting neuroscience topic, but also learn how to interpret experimental data and read papers critically and objectively. We will also think about the future experiments based on the paper we read.

BIOL	639	002	13714	PLANT CELL BIOLOGY	Lecture	1	A
					(Face to Face Instruction)		
<p>This course will give graduate and advanced undergraduate students an understanding of work opportunities and culture in the field of biotechnology. Students will meet professionals practicing diverse roles in leading companies, who will share their experiences in the industry and strategies for launching a successful career. Case studies of global challenges addressed by modern biotechnology will be presented, and students will have an opportunity to research and develop their own plan for a new biotechnology firm. The instructor, John Salmeron, has 25 years of experience working at multinational and startup companies, and now runs an independent consulting business.</p>

CHEM 262H.001   Honors Organic Chemistry I TR, 9:30-10:45am. Instructor(s): Michael Crimmins. Enrollment = 30. Continuation of CHEM 261H with particular emphasis on the chemical properties of organic molecules. This course will be similar to CHEM 262, but with greater emphasis on class discussion and on discussion of contemporary research problems.							
PREREQUISITE: CHEM 261 OR 261H.							
DEPARTMENT OF CHEMISTRY CONSENT REQUIRED. EMAIL chemus@unc.edu.

CHEM 430H.001 | Introduction to Biological Chemistry

TR, 11:00 am - 12:15 pm. Instructor(s): . Enrollment = 30.

Dynamic examination of the principles of biochemistry, from macromolecules through enzyme function and catalysis, and into the primary metabolic pathways that generate cellular energy. This course will be an interactive combination of lecture, group based guided inquiry along with presentations from students and deeper dives into topics of mutual interest to course participants. The goal of the course is to provide a detailed foundation in biochemistry and to teach critical thinking skills focused on understanding and challenging primary biochemical data. Students who enroll in this course are typically heading to graduate or professional school in this area of study, or will use the principles employed to enhance their problem-solving abilities.

Chemistry 430H is designed for chemistry majors and is not cross-listed with biol 430. Hence, Chemistry majors in the honors program will have priority.

Seats will open as follows: Chemistry majors in honors with senior status,

Chemistry majors in honors with junior status, Chemistry majors BS-Biochem, Chemistry majors BA. Any additional seats (and there usually are very limited

CHEM 460H.001 | Intermediate Organic Chemistry

TR, 9:30 am - 10:45 am. Instructor(s): Marcey Waters. Enrollment = 30.

Concurrent to CHEM 460 with increased emphasis on primary literature.

PREREQUISITE: CHEM 262 OR 262H.

TO REGISTER FOR CHEM 460H, YOU MUST BE REGISTERED FOR CHEM 460 FIRST. ONCE YOU ARE REGISTERED FOR CHEM 460, PLEASE EMAIL chemus@unc.edu REGARDING YOUR INTEREST IN REGISTERING FOR CHEM 460H.

Professor Waters's research interests are at the interface of organic chemistry and biochemistry. The overarching goal of her research is to design molecules to control biomolecular recognition for biomedical applications.

CHEM	467	001	1813	ADV ORG CHEM II	Lecture (Face to Face Instruction)	2		A
Bldg: Kenan Laboratories		Room: B121	Days: MWF	Time: 10:10 - 11:00	INST	100	Instructor: Nicewicz,David A.	
Class Enrl Cap: 25		Class Enrl Tot: 25	Class Wait Cap: 0		Class Wait Tot: 0	Class Min Enrl: 0		
GR1								
CHEM	468	001	1815	SYNTHETIC ORG CHEM	Lecture (Face to Face Instruction)	3		A
Bldg: Murray Hall		Room: G205	Days: TuTh	Time: 09:30 - 10:45	INST	100	Instructor: ALEXANIAN,ERIK J	
Class Enrl Cap: 30		Class Enrl Tot: 23	Class Wait Cap: 0		Class Wait Tot: 0	Class Min Enrl: 0		
GR1								
CHEM	481	001	1816	PHYSICAL CHEMISTRY I	Lecture (Face to Face Instruction)	3		A
Bldg: Venable		Room: G311	Days: MWF	Time: 10:10 - 11:00	INST	100	Instructor: BERKOWITZ,MAX L	
Class Enrl Cap: 36		Class Enrl Tot: 30	Class Wait Cap: 5		Class Wait Tot: 0	Class Min Enrl: 0		
GR1								
CHEM	481L	401	1820	PHYSICAL CHEMISTRY LAB I	Lab (Face to Face Instruction)	2		A
Bldg: TBA		Room: TBA	Days: M	Time: 13:25 - 17:15	INST	100	Instructor: MORAN,ANDREW M	
Class Enrl Cap: 12		Class Enrl Tot: 17	Class Wait Cap: 6		Class Wait Tot: 6	Class Min Enrl: 0		
GR1								
CHEM	481L	402	2490	PHYSICAL CHEMISTRY LAB I	Lab (Face to Face Instruction)	2		A
Bldg: TBA		Room: TBA	Days: Tu	Time: 13:00 - 16:50	INST	100	Instructor: MORAN,ANDREW M	
Class Enrl Cap: 12		Class Enrl Tot: 17	Class Wait Cap: 6		Class Wait Tot: 6	Class Min Enrl: 0		
GR1								
CHEM	481L	403	2491	PHYSICAL CHEMISTRY LAB I	Lab (Face to Face Instruction)	2		A
Bldg: TBA		Room: TBA	Days: W	Time: 13:25 - 17:15	INST	100	Instructor: MORAN,ANDREW M	
Class Enrl Cap: 12		Class Enrl Tot: 16	Class Wait Cap: 5		Class Wait Tot: 4	Class Min Enrl: 0

CLAS 055H.001 | Three Greek and Roman Epics

MWF, 2:30 pm - 3:20 pm. Instructor(s): James O'Hara. Enrollment = 24.

The course will involve a close reading in English of Homer's ILIAD and ODYSSEY and Vergil's AENEID, and as a transition from Homer to Vergil, we will also read the tragedies of Sophocles from fifth-century Athens. It was epic and tragedy that formulated the bases of Graeco-Roman civilization and provided the models of heroism and human values for the Western Tradition; along with raising fundamental questions about the individual's relationship to society. We will analyze, discuss, and write about these works both as individual pieces of literature in a historical context, and in terms of how they position themselves in the poetic tradition; after reading the ILIAD and ODYSSEY, we'll see how heroic myth gets reworked by tragedy for democratic Athens, and then how Vergil combines Homer, tragedy and other traditions to make a new poem for his time. We will look at aspects of structure and technique, questions of overall interpretation and values, and the interplay of genre and historical setting. Requirements: discussion, short online readings in addition to the primary texts, several short papers during the term, and a 6-10-page term paper.

**PREREQUISITES:**

First-year students only.

**DESCRIPTION:**

Helen of Troy is said to have been the most beautiful woman in the world, yet we have no evidence of what she really looked like. This missing piece has worked in her favor, as authors and artists have tried to fill in the blank ever since. For over two millennia, her story has inspired countless creative responses, from Homer's Iliad to Hollywood's Troy. Helen makes us think about issues that still resonate today: how do we define beauty? what is worth fighting for? how far should one go for love? In this course, we will study the story of Helen in multiple retellings, asking questions about the value of beauty, the risks of desire, and the consequences for society when individuals place love above all else. Students will read ancient and modern sources, analyze and debate them, and write about the issues. The course requires no prior knowledge of the material.

TITLE: Ancient Magic and Religion

GEN EDS: LA, WB

## DESCRIPTION:

Bindings and curses, love charms and healing potions, amulets and talismans ; from simple spells to complex group rituals, ancient societies made use of both magic and religion to try to influence the world around them. In this course, we shall examine the roles of magic and religion in the ancient Greek and Roman worlds, paying special attention to their local contexts and to the myths and actual techniques ancient practitioners used to serve their clientele.

In this class, we examine descriptions of religious and magical practices in the multicultural contexts of ancient Greece and Rome. Our sources include

CLAS 263H.001 | Athletics in the Greek and Roman World

TR, 2:00 pm - 3:15 pm; Recitation: M, 12:20 pm - 1:10 pm. Instructor(s): Alexander Duncan. Enrollment = 24.

To talk about sport is to talk about society, both today and in antiquity. This course will inspect the cultures of ancient Greece and Rome, from the age of Homer to the end of the (Western) Roman Empire, through the lens of athletics. We will scrutinize the mechanics and logistics of ancient athletic events and take up larger questions of interpretation, considering sport within its religious, cultural, and political contexts. Adopting and adapting an extensive battery of theoretical approaches¿economic, anthropological, poetic, political, sociological, etc.¿we will address such questions as the following: How do the ideals embodied in Greek and Roman sport relate to the myths and cultural practices of these societies? How were competitors, whether amateur or professional, rewarded and regarded by their societies? What ethical dilemmas did athletes face? Why were animals, slaves, and religious minorities subjected to blood-sport in Roman amphitheaters? Why did others volunteer to face the same fate? What legacies and lessons have ancient athletics left for the modern world?

CLAS 409H.001 | Greek and Roman Historical Literature

TR, 2:00 pm - 3:15 pm. Instructor(s): Emily Baragwanath. Enrollment = 24.

This course offers an overview of the historiographical tradition in classical Greece and Rome and explores in detail the surviving texts of the most important ancient historians. We will read in English translation selections from Herodotus, Thucydides, Polybius, Sallust, Livy, and Tacitus, considering their literary qualities and engagement with the historiographical tradition. The aim is for students to become familiar with the major ancient historians and to engage in critical and informed analysis of their strategies in representing the past, gaining insight into how a culture uses and interprets its own past.

Guided by ancient literary critics, we will ask: How aware are the Greek and Roman historians of the methodological and epistemological challenges presented by incomplete sources, conflicting perspectives, biased evidence, and the limitations of memory? What strategies do they use in confronting such challenges? To what extent are their interpretations pervaded by patriotic or moral bias? How far do they seek to illuminate universal truths through specific facts? Do

COMM 120H.001 | Introduction to Interpersonal and Organizational Communication

TR, 9:30 am - 10:45 am. Instructor(s): Katie Striley. Enrollment = 20.

Interpersonal communication is about our connections with other human beings. Communication shapes our understandings of ourselves, others, organizations, and social systems. Our communication creates and recreates the social worlds in which we reside. We often take interpersonal communication for granted, assuming that we already know much of it because we engage it on a daily basis. Yet, through engaged study, we will come to realize that interpersonal communication is complicated, consequential, and crucial. This course provides a space to openly analyze and discuss the role interpersonal and organizational communication plays in our understanding of self, other, and everyday life as constituted through the relationships that we create, sustain, and sometimes end.

COMM 325H.001 | Introduction to Organizational Communication

TR, 9:30 am - 10:45 am. Instructor(s): Dennis Mumby. Enrollment = 20.

This course will involve a critical examination of the field of organizational communication. We will begin by studying the various theories of organizational behavior that have been developed in the past 100 years, looking at both the elements of each theory and the ways that they have shaped organizational life. The course will examine organizations as complex social structures that exist in equally complex social and political environments. We will explore the nature of work and how it has evolved in recent decades, with particular emphasis on the world of work that students are likely to encounter after graduation.

We will also focus on the communication-organization relationship, examining organizations as communication phenomena. Through this communication approach, we will study various contemporary organizational phenomena, such as the new workplace, branding and consumption, leadership, gender and difference, and the

Course Topic: Screenwriting The Re-Write

This course is designed to take the completed feature screenplay written in COMM 537 and prepare the re-written final draft for production companies and agencies. It will begin with a complete structural review, character analysis, and dialog polish. A logline, synopsis and one sheet shall be developed. Critical analysis will be given, received, and addressed, resulting in a final screenplay package that is prepared to be submitted to professionals.

Detailed course description (at least 1-2 paragraphs, 1 page max):

A coverage sheet was provided to you for your final at the conclusion of COMM 537. You will make use these notes and prepare a substantive plan on how to address the notes and integrate them into your screenplay using re-writing techniques. At the beginning of the semester students will be required to write a logline and synopsis. Students will also be asked to create a one-sheet.

WRITING THE FULL LENGTH PLAY  
Course Topic: Writing the Full Length Play

This course expands upon the students basic knowledge of character, plot, dialogue, and structure. The importance of editing and revision are explored in great detail. Students will write a full length, polished script and receive instruction on submitting work to theaters. The prerequisites for this course are COMM 131, DRAM 231, or ENG 130 or 132. Students who do not have these requirements can contact the instructor for approval to take the course.

Howard Craft is creator of the first dramatic African American Super Hero Podcast and The Jade City Chronicles which is currently in development with a release date set for the spring of 2017. Craft is also the creator of audio drama, The Jade City Pharaoh and is the Department of Communication Piller Visiting Professor of Practice.

Course Topic: Ethnography of Technology and Digital Media

Prereq: COMM 140

Description: People integrate networked digital technologies into their lives in a variety of ways. Drawing on empirical, ethnographic accounts from theoretical perspectives including communication and media studies, internet studies, sociology, anthropology, and social computing, we will read accounts of cross-cultural and trans-national media practices to examine how people make meaning of emerging technologies. This course requires intensive reading and writing and a willingness to conduct field research, including interviews, participant observation, and qualitative data analysis.

Detailed course description:

The purpose of Hate Speech is to expose students to the nature of hate in American life. As we attempt to understand the essential qualities of hate we will learn that hate is made possible through communication (sometimes in the form of hate speech) and human perception (sometimes in the forms of stereotypes and bias). We will learn that hatred is sustained through the imposition of racist, sexist, and heterosexist ideologies that privilege Whiteness, maleness, and heterosexuality. Sometimes these ideologies are explicitly understood by the people who use them. Sometimes these ideologies and the assumptions underlying them are only implicitly understood and we may be relatively unaware of their influence.

We will also learn that hate may also be resisted through communication. Students will learn how communication may serve to teach respect and tolerance,

Class meetings may also be held in the following alternative locations: Swain Hall 106A and Swain Hall 200A.

Detailed course description:

This course is designed to provide a structured environment, instructor and peer feedback, along with production & postproduction resources in which to complete an advanced near-to-graduation media project. The project can be in narrative, documentary, experimental, or interactive, with a running time for videos of no longer than 20 minutes. The course assumes the student has already taken a fair number of the post-COMM 230 production courses offered in the department.

Seniors only.

This course has classification (class year) restrictions.

Permission of instructor for nonmajors.

A capstone course for seniors who are on the COMM Media Production track, and who have completed significant preparatory coursework. COMM 230 and at least one 500-600 level production course are required. Interested students must apply in the Fall with a project to be considered for enrollment. Students in the course will complete an advanced media project in narrative, documentary, experimental, multi-media or audio.

This course is for Seniors only.

		22-NOV-2019	RC PLAN UGRD COMM MAJ		0	6	

This course is reserved for COMM students for the first two weeks of enrollment. Non-majors can begin enrolling on November 19th

In this course students will learn a wide range of post-production techniques for video projects, using primarily After Effects (and Photoshop, to a lesser

extent). Topics explored include: Compositing, that is to say the integration and collage-ing of multiple video/film/still/text layers. Motion Graphics deals with the movement through 2D and 3D screen space of these layers, and Visual Effects will consider the myriad ways one can distort, color manipulate, and modify these layers, or create such phenomena as smoke, rain, etc. Besides creating projects using these techniques, we will also screen and analyze how this form of image manipulation is used in television and motion pictures.

In Media in Performance, students will acquire advanced skills and explore critical approaches that are necessary for creating advanced, professional multi-media works in concert with live performance. Working collaboratively, using text, music, and devising processes, students will refine their understanding of the concepts and processes of creating multi-media theatre and build performance works that marry live and mediated elements in a fully integrated experience.

This course will be divided into two units: the first unit will look at poststructuralist film theory generated after the apparatus theories of the 1960s and 70s, the second unit will examine responses to and departures from poststructuralist film theory since then, in other words, even more contemporary film theory. We will aim to understand the interventions and contributions of the theories in both units, not as an attempt to dismantle them but to understand their investments, political orientations, and disciplinary contexts from which they emerged.

In the first unit we will read from such schools as feminist film theory, including scholars like Laura Mulvey, Teresa de Lauretis, Mary Ann Doane, and Kaja Silverman. We'll read through psychoanalytic approaches to film theory, theories of representation, enunciation, postcolonialism, as well as hybrid cultural studies texts that appeal to film theorists as well as wider terrains of visual and popular culture such as Frederic Jameson, Linda Williams, and Richard Dyer.

The second unit will look at various forms of film theory that have emerged after the dominance of poststructuralist models, specifically focusing on orientations towards phenomenology, embodiment, and theories of the senses. We'll read not only from theories of film but also some new media theory and

Course Topic: Movie Making Machines: Learning About Cinema in the Maker Space

Though we generally think of movies as the result of the work of screenwriters, cinematographers, actors, and directors, movies are also the product of a range of scientific and technological concepts and innovations. The magic of the movies begins with the technologies that make moving images possible. This projects-based seminar will introduce students to the fundamental optical and technological principles of motion pictures. By using the Maker Space to design and fabricate cameras, lenses, film strips, and movie projectors, students will gain a deep understanding of the material and technological foundations of the cinema, and the operating principles that are behind not only the classic films of Hollywood's past, but the high-definition digital imaging technologies of the present.

Over the semester, students will learn about the history and science of early cinema through lectures and readings while delving into the principles of

rese Description:

\* This course is a core course for the Graduate Certificate in Participatory Research.

\* This class seeks to explore the fundamental connection between critical social theory and qualitative

research through readings, discussion, and workshop techniques. The class is divided into three

sections:

COMM	825	002	12142	SEM INTERP/ORG COMM	Lecture (Face to Face Instruction)	3	A
<b>Bldg:</b> Murphey		<b>Room:</b> 0111	<b>Days:</b> Th	<b>Time:</b> 18:30 - 21:20	INST	100	<b>Instructor:</b> PARKER,PATRICIA S
<b>Class Enrl Cap:</b> 15		<b>Class Enrl Tot:</b> 0		<b>Class Wait Cap:</b> 0	<b>Class Wait Tot:</b> 0	<b>Class Min Enrl:</b> 0	

GR3

This seminar will draw from recent texts (Crehan, 2016; Thomas, 2009), essays (Wilderson, 2003; Smith 2010), and readings from Antonio Gramsci's Prison Notebooks, to explore the subaltern as a site for progressive activism. Moving beyond traditional Marxist class analyses based solely in the realm of the economic (e.g. reducing social conflict unilaterally to the conflict between wage labor and capital), we will explore the many ways structural inequality manifests itself in everyday life and how this entry point informs various conceptualizations of subalternity (e.g., Spivak's versus Scott's versus). We will also consider the 'archive' of subaltern conceptions of the world (folklore, art, popular culture, language) bringing together related Gramscian concepts of 'common sense/good sense' and 'organic intellectuals' to consider how certain persuasive political narratives come to resonate or not with subaltern 'common sense.' Drawing on case studies, the seminar asks participants to interrogate the radical epistemological claim underpinning Gramsci's insistence that progressive activists pay attention to subaltern common sense.

Course topic: Buff and Polish

The objective of this seminar/practicum is to provide students with an orientation to the process of finding employment in an academic setting, and to provide students with opportunities to develop the materials necessary to assist in that effort. While the focus is primarily on entry-level academic positions, such as Assistant Professor, materials developed as part of the course are applicable to applying for post-doctoral fellowships, "ABD" positions, and work in other settings (eg. governmental) requiring a Ph.D.

COMP 060H.011 | Robotics with LEGO

MW, 9:05 am - 10:20 am. Instructor(s): Henry Fuchs. Enrollment = 24.

This seminar explores the process of design and the nature of computers by designing, building, and programming LEGO® robots. Competitions to evaluate various robots are generally held at the middle and/or at the end of the semester. Previous programming experience is not required. Assignments will typically take one to two weeks, most of them building on a previously constructed robot and making one that will perform a more complex task. Early robots will follow black race course routes or run through mazes constructed on the floor of the robotics laboratory. Later robots may play simple games with human users. Others robots will play simple soccer games, remotely controlled by human handlers. Most assignments will include a written report, as well as a demonstration of a working robot and a listing of its computer program.

FIRST YEAR STUDENTS ONLY.

COMP 089H.080 | Video Killed the Radio Star: Netflix, Deep Fakes, and Body Cams

TR, 11:00 am - 12:15 PM. Instructor(s): Ketan Mayer-Patel. Enrollment = 24.

The rise of streaming video as a data type has completely transformed our relationship to audiovisual information and the ways in which we use it. Today, over 70% of all Internet traffic is in the form of video. We no longer watch television at common times and mediated through the tastes and decisions of a handful of programming executives. Instead, independent producers of niche genres are increasingly able to find an audience on streaming video platforms. Similarly, the production of video has been democratized with the advent of the smartphone making each of us a potential documentarian of the world around us. In this course, students will learn about the technological underpinnings of video as a data type and explore potential uses and misuses of video in the contexts of entertainment (Netflix), disinformation (deep fakes), and social justice (police body cams).

In order to enroll in the class, please complete the following google form: <https://goo.gl/forms/Lptn83pFYRmuacjG2>. If you are accepted, you will receive a permission code that can be used once you can register.

This course provides an experiential learning environment so you can gain experience building the early stages of a software startup. This course is a lab, where you will be working in teams, brainstorming a new product or service concept, actively getting feedback from potential customers and partners, researching competitors, and developing a "minimum viable product." A minimum viable product is a product or service with the smallest number of features that will provide value to a set of customers. The end goal is to develop a software product or service that customers will actually want to use. For the course, you can either pursue a for-profit or non-profit startup idea.

COMP 380H.001 | Introduction to Digital Culture

TR, 2:00 pm - 3:15 pm. Instructor(s): Tessa Joseph-Nicholas. Enrollment = 24.

This course examines the nature, function, and effects of the Internet and Internet use in the context of an extended study of its history, considering key technologies, concepts, ideas, innovators, and historical and sociocultural influences. Significant reading, writing, research, and beginner-friendly, code-light web development and data science components. No previous programming or technical experience is required. This course is suitable for both CS majors and nonmajors.

Tessa Joseph-Nicholas, MFA/PhD, is a Teaching Associate Professor in the Department of Computer Science. Her teaching and research explore the intersection of computing technologies and human culture with a blend of approaches and methods from the computational to the creative. Specific interests include Internet histories, cultures, and communities; digital literatures, arts, and poetics; inclusive, accessible web design and development; net neutrality and

COMP 585H is taught in conjunction of COMP 585: that is, it is a single set of lectures that all students will attend. Students interested in 585H are to enroll in 585 and switching to the honors section will be done after the first day of class. In addition, COMP 585H students will have an additional project separate from the class assignment and will have a weekly meeting related to it. The additional project will be built around the specific interests of the students but will include more in depth development and design of topics taught in COMP 585. Possible topics include techniques for adapting the difficulty of a game to a player's achievements or topics of current research within the department such as advanced simulations of human behavior, sound simulation or use of devices such as Oculus Rift or Google Glass. COMP 585H students may work in teams or individually on their projects.

VR and AR are accelerating in popularity, and now that the tech behind them is solid, the industry is considering the factors that make their applications useful and enjoyable. These factors which affect human perception and interaction with these devices is part of a field called Human-Computer Interaction (HCI), which focuses more on the human side of why VR works. For example, what makes one app look better than another? It's not as simple as visual quality...what about style and visual features like mirrors? How does my experience change if I can walk around the game world with my own feet or interact with virtual objects with my real fingers? How do we represent other players? These are difficult questions to study definitively, but there are many subjective AND objective ways of measuring the human experience, and in this class, we take a look at both the tech and HCI side of the VR equation. In the lectures, we go over the high-level material related to how various VR tech works (e.g. 3D graphics, spatialized audio, haptics, locomotion) and how we can measure the quality of various techniques (SSQs, SUS Presence questionnaires, etc.). In the assignments, the goal is for you to complete the class with a

framework containing many of the technical features that are important to VR that will naturally extend to research and practical applications.

## PREREQUISITES:

First-year students only.

## DESCRIPTION:

This seminar will explore the artists, art and technology involved in creating the world of the play. It is intended as an overview for students who want to learn about theatrical design. Students will create their own designs in the areas of scenery, costumes, and lighting for three plays throughout the semester. The plays will be placed outside of their traditional setting while still maintaining the story and themes. Students have placed Shakespeare's A Midsummer Night's Dream in a trailer park and a daycare center for example. Careful historical research, close reading and analysis, text and source material, and collaboration will be the focus of the student projects.

GR1

In this Voice and Acting Class, the students will take a journey on getting to know, enjoy, and relish in their authentic voice. Through awareness and practice of the continuous breath, the student will develop new habits of experiencing their breath, voice, body and how they live in this world. After the ground work has been laid, the students will integrate their voice into acting. The class will consist of work on poetry, contemporary acting scenes, Shakespeare monologues and Shakespeare scenes.

## Advanced Directing:

Using the foundation tools introduced in Dram 300, Advanced Directing will delve further into the role of director and what is needed to achieve successful storytelling for the stage. With an emphasis on text analysis and communication, the classroom becomes a laboratory where students have the opportunity to direct multiple scenes, devised work, and enhance their vocabulary for discussing the work. They will also explore the current world of professional directors and their approaches to the work. By the end of this course students will know the importance of having a point of view and what it means to be a leader within the creative process.

## THE ACTOR'S ROLE IN BRINGING AUGUST WILSON'S DRAMATIC VISION TO LIFE

In this course you will:

- 1) Study the life and work of August Wilson, a great African-American playwright,
- 2) Develop your acting skills by working on scenes from August Wilson's 10-Play cycle.
- 3) Please note that you will be portraying fictional characters that may not be of the same race or gender with which you identify.

DRAM 475H.001 | Costume History: Africa, Asia, and Arabia

TR / R, 12:30 pm - 1:45 pm / 4:00 pm - 5:00 pm. Instructor(s): Bobbi Owen. Enrollment = 7.

The course considers traditional garments worn in Africa, Asia, and on the Arabian Peninsula. Specific peoples considered vary from semester to semester. Class format for 12:30-01:45 is mainly lecture accompanied by numerous illustrations; there are also demonstrations and lots of real objects to view (and handle). Students who participate in the Honors section will also meet on Thursday afternoon from 4-5 pm and consider the ways in which ethnicity in dress is re-interpreted and/or mis-interpreted by Hollywood. The film, Black Panther (Ryan Coogler, 2018), depicts characters very effectively -- even though they are wearing elements of traditional dress from several different peoples in Africa. We will examine the costumes in that film and a few others (chosen by the class) which might include The Queen of Katwe (Mira Nair, 2016) and English Vinglish (Gauri Shinde, 2012).

This course is designed to familiarize students with great works of literature written during the earlier part of the Western tradition. Our primary task will be to learn to understand and appreciate these texts, which are in many ways quite different from those of the modern world. We will also try to gain some general knowledge of western literary traditions from classical antiquity to the Enlightenment, much of which will be relevant to the reading of later, more modern works of fiction.

While we will concentrate on analyzing and enjoying each text on its own terms, we will also be making comparisons and following some common themes throughout the course. All of our texts are larger works composed out of collections of shorter tales. We will be exploring how each work strives to compose a whole out of its parts; how the shorter tales compare with each other within each work; and how tales from different works may be compared with each other. Works read include: Genesis, Homer's Odyssey, Ovid's Metamorphoses, The 1001 Nights, The Decameron, and Grimm's Fairy Tales.

CMPL 255H.001 | The Feast: Food in Film, Philosophy, and Fiction

MWF, 9:05 am - 9:55 am. Instructor(s): Inger Brodey. Enrollment = 20.

While its individual form and content may differ greatly, the feast or banquet functions as a strong symbol in most global communities. Food and feasting

often defines community by establishing a connection between those who eat, what they eat and how they eat: as such it shapes national and cultural identities. As it is portrayed in Western philosophy from the seminal banquet in the pages of Plato's Symposium, the feast is simultaneously erotic and philosophical. It has the potential to descend into gluttony or to rise to the level of the sublime. Feasting can represent communion or transgression, just as eating "the flesh" may symbolize one of Christianity's most central rites or one of Western society's central taboos. In Asia, the influence of Buddhist reincarnation has instilled additional meanings and taboos upon the consumption of food. The multiple purposes and nuances of food make it a rich theme in literature, film, and the visual arts. The food and banquet film has recently become a genre unto itself, and the outpouring of films are helpful in understanding cross-cultural differences in the social and philosophical understandings of what it is to be human. In addition to readings in philosophy,

In this course, we will encounter key texts by French thinkers who influenced literary critical theory in the 1970s and 1980s--Michel Foucault, Roland Barthes, Jacques Derrida, among others--as well as a by critics who later responded to, incorporated, and assimilated their work; Eve Sedgwick, Gayatri Spivak, and Stephen Greenblatt, among others. Our emphasis will be on tracing the lines of engagement among these thinkers, with special attention paid to the places where they intersect or diverge from one another. Around what debates was late twentieth-century criticism organized? What were the origins of those debates, and what the outcomes? Following these lines of engagement into the present, we will also consider the state of literary theory.

Our course is cross-listed: as a course in Comparative Literature, the course focuses on defining the epic genre and understanding formal qualities of epic poetry. As a course in the Peace, War, and Defense Curriculum, the course focuses on the historical influences exerted by ancient epics in matters of war and peace, the rise and fall of empires, imperial ambition, and related issues of defense and diplomacy. This class counts towards PWAD, CMPL, GLBL, EURO and other majors: in the past, the course has been approved, when requested, for HIST, POLI, the MEMS minor, and for Honors. We will plan to have frequent conversations with the former British Ambassador to the United States, Sir Christopher Meyer. Sir Christopher is a world-renowned diplomat, an expert on Brexit, an accomplished author and journalist, and the former British Ambassador to Germany. He has enjoyed a rich and storied diplomatic career: he has been tailed by KGB spies and has hosted meetings with heads of state. He will share his behind-the-scenes views regarding the play of diplomatic power regarding major events in recent years: the catastrophic events of 9/11, the assassination of Litvinenko, the attempted assassination of Sergei Skripal, the inner workings of the Clinton White House, the inner workings Bush White House, the diplomatic initiatives of Tony Blair and Theresa May, as well as breaking news on Brexit and Boris Johnson, and much more.

This course examines the international evolution of the essay film after World War II. The essay film is a highly self-conscious genre that combines fiction and documentary, incorporates the subjectivity of the filmmaker, relies crucially on montage, and addresses the viewer as a participant. An "essay" in this context is less an argument than an investigation that proceeds in an exploratory fashion. The filmmaker's perspective is not just asserted but self-critically questioned through meditations on perception, memory, and identity. We will consider how essay filmmakers have confronted horrors of history (in particular the Holocaust), urgent political matters, and the workings of audiovisual media themselves. We will study this genre through multiple approaches including affect theory, phenomenology, critical race theory, feminism, and more.

GR3

This course is designed to introduce students to some of the major strains in literary criticism from the Classical Period to the 18th century. Readings of major authors will be paired not only with literary examples contemporary with our chosen critics, but also with modern day theoretical responses to their works. Our objective is a working knowledge of dominant trends in European literary criticism up to (and including) the Enlightenment, useful in understanding the literature of the successive historical periods and also as a continuing, vital influence on twentieth-century poetics. We will also be devoting some time to the primary non-Classical tradition of early Western literary criticism, namely Biblical interpretation. Authors read include Gorgias, Plato, Aristotle, Aristophanes, Horace, Longinus, Philo, Proclus, Plotinus, Augustine, Scaliger, Luther, Boileau, Sidney, Burke, Young, and Lessing; Homer, Pindar, Callimachus, Ovid, Vergil, Dante, and Pope; and Auerbach, Derrida, Genette, Ricouer, Benjamin, and Bernal. (Downing S19)

Navigating the Literature of Friendship

This graduate course will focus on a burgeoning field of literary research and scholarship; the intersection between literature and friendship studies. We will study literary works that focus on friendship, and friendship's relationship to the collective; family, society, community. We will read representative works chosen from a wide range of time periods and cultures, from ancient epics and romance to Early Modern poetry, drama, and prose to modern novels, from authors as diverse as Homer, Heliodorus, and the unknown creator of Gilgamesh, to Cervantes, Petrarch, Shakespeare, and Marguerite de Navarre, from Dickens and Eliot, to Steinbeck, Morrison, Allende, Atwood, and Hosseini. Theoretical works about amity and amity studies will also be an integral part of the course, including selections from Aristotle, Cicero, Aquinas, Montaigne, Erasmus, Foucault, Derrida, Bray, and more.

ENGL 057H.001 | Future Perfect

TR, 3:30 pm - 4:45 pm. Instructor(s): Matthew Taylor. Enrollment = 24.

What will our world look like in ten years? Fifty? One hundred? Will the future be a utopian paradise or a dystopian wasteland? Through a wide-ranging survey of popular science writing, novels, and films, this first year seminar will examine fictional and nonfictional attempts to imagine the future from the nineteenth century to the present. We will explore everything from futurology and transhumanism to warnings of imminent environmental collapse. Our focus will be less on assessing the accuracy of these predictions and more on determining what they tell us about the hopes and fears of the times in which they were made. The course will culminate in a short research paper on a future-oriented topic of your choosing.

My research focuses on the intersections among environmental humanities, critical theory (including posthumanism, biopolitics, science and technology studies, and critical race theory), and nineteenth- and twentieth-century American literature. My first book, *Universes without Us: Posthuman Cosmologies in*

ENGL 071H.001 | Doctors and Patients

MWF, 9:05 am - 9:55 am. Instructor(s): Kim Weed-Buzinski. Enrollment = 24.

When medical anthropologist Arthur Kleinman writes that illness has meaning, he reminds us that the human experience of being sick involves more than bodily symptoms. Moreover, the effects of illness and debility are rarely confined to one person. In this course, we will analyze a diverse collection of writers who have taken as their topic the human struggle to make sense of suffering and debility through a range of genres including fiction, non-fiction, graphic memoir, podcasts, and oral histories.

Divided into five units, the course will allow us to explore not just the medical, but also the personal, ethical, cultural, spiritual, and political facets of illness from the perspectives of patients, healers, and families. Central texts may include Abby Norman's *Ask Me About My Uterus*, Damon Tweedy's *Black Man in a White Coat*, and Jennifer Brea (dir.) *Unrest*. We will also read shorter selections from an array of authors, such as Atul Gawande, Bettina Judd,

Arthur Kleinman, Audre Lorde, Mia Mingus, Leah Lakshmi Piepzna-Samarasinha, and Susan Sontag. Additionally, students will utilize the growing archive of

ENGL 089H.001 | Literature of the Last Man

MWF, 11:15 am - 12:05 pm. Instructor(s): David Ross. Enrollment = 24.

This course considers post-apocalyptic scenarios involving the depopulation of the earth and ponders the existential solitude that befalls the last man. It pays particular attention to the interconnection between the last man scenario and related narratives of social dislocation: the Robinsonade (i.e., tale of the castaway), the Western, the wilderness survival adventure. Our questions will be various: What explains the anxieties implicit in the last man scenario? What does the last man teach us about ourselves? What if any consolations are available to a mortal species?

FIRST YEAR STUDENTS ONLY.

David A. Ross is a graduate of Yale and Oxford. He has been a member of the Department of English & Comparative Literature at UNC-Chapel Hill since 2002. He

How did the ten-dollar Founding Father without a father inspire the hottest ticket on Broadway? Why do some women now wear head-to-toe scarlet robes when participating in public protests? We'll examine these questions and more during Spring Semester 2020, when English 127, Writing about Literature, zeroes in on the musical Hamilton and on Margaret Atwood's dystopian novels, which inspired Hulu's TV series The Handmaid's Tale. Studying these texts, we'll pursue this course's overall aim, to foster your enjoyment in reading and writing about literature. Along the way you will also hone these skills, which are portable to many other courses in the English major and elsewhere: (a) articulating your own responses to a literary work, (b) understanding its formal features, such as metaphor and allusion, (c) reading scholarship without losing your own voice, and (d) revising your essays for maximum effectiveness. This course fulfills requirements for LA (Literary Arts) and CI (Communication Intensive). Majors and non-majors welcome.

Required Texts: Lin-Manuel Miranda and Jeremy McCarter, Hamilton: The Revolution, 2016;  
Original Broadway Cast Album, Hamilton, 2015; Chernow, Hamilton, 2004; Atwood, The Handmaid's Tale, 1985; Atwood, The Testaments, 2019.

.ENGL 132H.001 | Honors: Intro to Fiction Writing

TR, 2:00 pm - 3:15 pm. Instructor(s): Marianne Gingher. Enrollment = 15.

This course is a collective, collaborative exploration of the processes and techniques of fiction, through close observation and discussion of about two dozen stories, and the writing of 3-5 short exercises dealing with the elements of fiction (setting, characterization, dialogue, point of view, etc.) and, later in the term, one short story (2,000-5,000 words). There is a midterm examination on terms discussed and readings from textbook. The class is a seminar, a workshop with both written and oral critiques of student works required, and students can expect an atmosphere that is lively and encouraging as we investigate the imaginative craft of fiction.

FIRST YEAR HONORS CAROLINA STUDENTS ONLY.

.ENGL 133H.001 | Honors: Intro to Poetry Writing

TR, 9:30 am - 10:45 am. Instructor(s): Alan Shapiro. Enrollment = 15.

In this class we'll be thinking about every aspect of the poem. What inspires us to write them, how do we start? And, most importantly, how can a deep understanding of poetic craft help us to make rigorous and muscular poems from the raw material of our lives and vision? We will look at the work of established poets to help us increase the power of our own. We will think about traditional forms as an invitation to our own urgent, necessary and deeply contemporary work. More than anything poetry is a conversation that's been happening over millennia. We will endeavor to find where we fit in and where and how we are blazing our own path. This is an Honors class so students will be expected to be actively engaged in their own work and the work of their peers. As such, each student will be paired with another member of the class as a Primary Reader. Primary Readers will write letters to each other throughout the term as means of thinking about how we talk (even at the beginning of our poetic lives) about the arc of another writer's poems and poetic pursuits.

Now in its second century, the cinema remains one of the most popular global art forms. Storytelling techniques first used a century ago, from close-ups to parallel editing, continue to be vital today. At the same time, audiences are often unaware of the work that goes into creating motion pictures, and lack a language to describe, precisely, how movies work. In this class, we will develop skills as interpreters and analysts of the cinema by focusing on the work of some of the most exciting contemporary directors working today. We will consider how they utilize long established film techniques and develop new ones in service of realizing the full potential of the moving image. Through a series of short assignments, we will become more astute viewers of the movies, and of the many images that populate our daily lives and our imaginations. Each week, we will focus on a set of cinematic techniques, and a director whose work exemplifies those techniques. Directors to be discussed include Ryan Coogler, Ava DuVernay, Taika Waititi, Edgar Wright, Alfonso Cuaron, Asghar Farhadi,

Xavier Dolan, Kelly Reichardt, Steve McQueen, Yorgos Lanthimos, Celine Sciamma, Marielle Heller, and Bong Joon-ho. Assignments include short writing responses, a midterm, and a final.

(De)constructing Race Onscreen

We will explore how race is constructed in many genres of film, including science fiction, horror, comedy, superhero franchises, documentary and beyond. Popular films might include: Us (2019), Crazy Rich Asians (2018) and Black Panther (2018), alongside independent and lesser-known works like Killer of Sheep (1978), The Watermelon Woman (1996), Reassemblage (1983), La Llorona (2019), and Rhymes for Young Ghouls (2013). Using film as our lens, we will examine racial structures, racism, and anti-racism in the U.S. and beyond, paying special attention to the relationships between racialized groups, including Black, Asian, and Indigenous, and Latinx perspectives.

This course will serve as an introduction to popular genres by giving special attention to Young Adult literature, as well as its various subgenres (dystopian, gothic, medical, social justice, etc). In order to better understand the complexities of Young Adult literature, and by extension genre, we will have three main points of focus. First, we will be exploring the process by which a writer establishes, or partakes in, genre conventions. Following this concentration on the writer's role, we will be turning our attention to the reader(s) and how they impact the the life of a genre. Finally, we will be tracing how the category of Young Adult has historically been defined, as well as how it continues to change today. After this course, everyone will have experienced the genre of Young Adult literature in its various nuances. Course assignments may include: short bi-weekly reflection papers, a longer close reading paper, exam(s), and a field observation of an event related to the world of Young Adult literature. Texts for the class may include:

¿ Mary Shelley, Frankenstein (1818)

¿ J.D. Salinger, The Catcher in the Rye (1951)

¿ Jesse Andrews, Me and Earl and the Dying Girl (2012)

In a recent book, communications scholar Tarleton Gillespie quips that we have now entered the long hangover of web 2.0. Indeed, the past few years have marked a distinct shift in how we understand the internet. This section of Digital and Multimedia Composition will consider the unique political, ethical, and rhetorical challenges of composing online in the year 2020. Our key concept will be attention; the central resource of the digital economy and a notion linking online composition with millennia of rhetorical theory and practice. Students will study issues related to digital composition and will create multimedia projects that respond to these concerns in depth. Topics may include clickbait, internet arguments, digital conspiracism, information ethics, propaganda, outrage culture, online extremism, and the political economy of digital platforms.

California and the New York Island mark the boundaries along either side of America, and the Mason and Dixon line marks a physical boundary running across the middle. But beyond its geographic features, what is America? Did its Southern swamps spontaneously produce the writings of William Faulkner along with blues music? Did Willa Cather's novels arise magically from the Midwestern plains? Do America's urban novels tell a different American story from either of these? In this course we will examine aesthetic changes across the major literary movements of twentieth century American fiction, examining distinctively American themes such as the road, the cowboy, rags-to-riches, region, and nature.

In this course, we will consider a range of war texts, including All Quiet On the Western Front and The Things They Carried as well as several classic war movies. Two 4-6 page essays will be required in addition to a final exam. The course will feature at least two veteran guest speakers and a student veteran serving as an undergraduate teaching assistant will help lead several of our discussions. Interaction among veterans, military affiliated students and civilians is a crucial element of this course and one means by which it creates a bridge across the so-called civilian-military divide.

While civilians and all members of the armed forces have valuable insights to offer about war, this course will focus mainly on the writings and experiences of land-based combat veterans in World War I, Vietnam and the wars in Iraq and Afghanistan.

Themes we'll address will include:

- the role of story-telling in making sense of human experience

Got wanderlust? In this class, you'll learn how to quench it with your pen. We'll survey travel literature throughout the ages ¿from Marco Polo's outlandish adventures to Robyn Davidson's 1,700 mile trek across the Australian Outback with four camels and a dog named Diggety ¿with essays by Langston Hughes, Bruce Chatwin, Ma Jian, Rosemary Mahoney, and Pico Iyer in between. Then we'll venture out into the Piedmont for our own solo journeys, capturing the people and places we encounter in visceral detail. So lace up your boots: in this class, we'll be roaming.

This course will focus on important poets and poetic movements in the United States in the long twentieth century, 2000-2015. We will explore the ways that poetry serves as a means of expressing alienation from social conditions and expectations, as well as the ways it can create new understandings of social belonging. Special attention will be paid to writings by poets about what poetry is and does. Movements include: the Harlem Renaissance, Modernism, Confessionalism, and the Black Arts Movement. Poets include: Langston Hughes, T.S. Eliot, H.D., Frank O'Hara, Sonia Sanchez, Robert Lowell, Elizabeth Bishop, Adrienne Rich. We will also read works by poets writing today. No previous experience in reading or writing about poetry is required.

VICTORIAN AFTERLIVES

In this course we will explore the question, "Why do contemporary writers and filmmakers write back to or revise and adapt Victorian novels? We'll read two important Victorian novels, JANE EYRE and GREAT EXPECTATIONS, and for each, two modern prequels or sequels or other adaptations. We'll also view film adaptations. In each instance, we'll consider how modern artists have used the Victorian material to speak to our own time. Readings will include WIDE SARGASSO SEA, THE EYRE AFFAIR, MISTER PIP, and JACK MAGGS.

GR1

Disability Studies is an interdisciplinary field that, according to Simi Linton, aims to expose the ways that disability has been made exceptional and to work to naturalize disabled people. Almost every human will experience a significant illness or disability in their lifetime; therefore, investigating the lived experience of disability, representations of disability, and cultural understandings of disability give us insight into the ever-changing relationships among our selves, bodies, and worlds. This course will introduce students to key concepts and debates in the field of Disability Studies by drawing on multiple disciplinary perspectives. Through readings (critical essays, fiction, memoir, poetry, and film), guest lectures, and professor and student-led discussion, students in this course will be introduced to the biomedical, social, minority, and justice models of disability; explore the histories of particular disability communities and activists; examine representations of disability from across historical periods and cultural contexts; and study how multiple forms of inequality and oppression intersect with disability and disability justice work.

What kind of cultural work do children's books do? When we read them, how can we read history and our meaning in it? How do different periods constitute childhood differently? What do we mean by childhood now? We read key texts from the history of children's literature and discuss conventions of that tradition. Authors might include Alcott, Barrie, Baum, Carroll, Floyd, Rowling, Stevenson, Tolkien, etc. Lecture and seminar discussion; written papers, oral presentation, and project-based work.

ENGL	288	001	12635	LITERARY MODERNISM	Lecture (Face to Face Instruction)	3	A
<b>Bldg:</b> Greenlaw		<b>Room:</b> 0304	<b>Days:</b> MWF	<b>Time:</b> 14:30 - 15:20	INST	100	<b>Instructor:</b> FISHER,REBECKA Rutledge
<b>Class Enrl Cap:</b> 35		<b>Class Enrl Tot:</b> 5	<b>Class Wait Cap:</b> 5	<b>Class Wait Tot:</b> 0	<b>Class Min Enrl:</b> 0		

GR1

Literary modernism's defining characteristic may well be captured by two famous phrases: Arthur Rimbaud's Il faut être absolument moderne! (One must be absolutely modern!) and Ezra Pound's make it new! Both mantras, on their surface, call upon the artist to discard the mantle of tradition and experiment with the possibilities inherent in every medium, including fiction, poetry, film, drama, and music. Theories of modernism, then, broadly index a range of aesthetic movements, including avant-gardism, cubism, dadaism, jazz, futurism, surrealism, Négritude, the Harlem Renaissance, and even existentialism. Just as one attempts to understand literary modernism, it immediately becomes apparent that other modernist aesthetics must also be engaged in an effort to grasp the vast beauty and innovations of modernist writing. This course introduces students to the many faces of modernism as they peer forth from many disciplines and areas of thought. Students will especially appreciate the global re-framings modernism itself demands, and will emerge from the course having undertaken a critical, transnational, cosmopolitan journey across multiple artistic terrains.

The International Folktale in Gaelic Scotland and Its Diaspora:

This course introduces students to the Scottish Gaelic folktale, among the richest corpora of oral narrative in Europe. By presenting Gaelic oral texts in

English translation within international comparative contexts, students will be transported from Scotland's Highlands and the Hebrides to Atlantic Canada, from Iceland to Japan, from Ancient Greece to the Appalachians and beyond. Students will also hone their skills in the comparative analysis of these tales as documented within both modern Scottish Gaelic oral tradition and their relationship to international counterparts. Various methodologies belonging to folkloristics and traditional narrative scholarship will be engaged towards this end. Ultimately, both the tellers and audiences alike cherished these folktales as popular entertainment of near-universal appeal, capable of transporting all who listened to fantastic worlds of magic inhabited by gift-bestowing fairies, clever foxes, as well as dragons and their slayers.

ENGL 325H.001 | Shakespeare and His Contemporaries

TR, 11:00 pm - 12:15 pm. Instructor(s): Mary Floyd-Wilson. Enrollment = 20.

In this course, we will read The Taming of the Shrew, All's Well That Ends Well, Cymbeline, Measure for Measure, The Merry Wives of Windsor, Antony and Cleopatra, and As You Like It. We will consider, in particular, how the plays' representation of women lines up with, or departs from, what Shakespeare's contemporaries wrote about gender roles. What did it mean in Shakespeare's culture to be a wife, mother, daughter, sister, widow, maid, whore, nun, virgin, queen, scold, or shrew? To enrich our reading of the plays, we will also examine excerpts from a range of primary texts from the period, which may include pamphlet literature, household manuals, conduct books, homilies, sermons, ballads, and medical writing. These contemporary materials will inform and complicate our understanding of gender identity, sexuality, marriage relations, domestic practices, kinship networks, and social hierarchies. We will focus on expanding the methodological possibilities for interpretation of Shakespeare's plays and his portraits of women in both discussion and writing based on contextual information provided through historical discussions and primary documents.

This interdisciplinary course examines the technical and aesthetic revolutions in the fine arts of the English Romantic Period. It will discuss productions, experiments, and aesthetic theories of William Wordsworth, S. T. Coleridge, J. M. W. Turner, and William Blake, focusing on the developments of lyrical poetry, landscape painting, and original printmaking. We will pay special attention to the period's new ideas about nature, the sublime, picturesque travel, genius, originality, and social role of the artist. There will be a studio workshop in drawing landscapes in pen and ink according to 18th-century techniques and formulae and a workshop in printing facsimile plates from Blake's *Songs of Innocence and of Experience*. Knowledge of printmaking and painting is not required.

.We'll start with a review of our literary ancestors, from Montaigne in the 16th century to Baldwin and Didion in the 20th. Next we'll examine some of the most exciting essayists composing today: Solnit, Rankine, Urrea, Jamison, and Gay. Then we will funnel our energies into our own creative works, from internal excavations to external investigations that take risk both in content and in form. In this class, you will learn how to feed yourself as an artist, not just figuratively but literally. Not only will we be paying homage to our muses and motivations, we will also strategize on sustainable ways of funding our practice. Along the way, we will strive to build a community of life-long readers with whom we can continue sharing our work long after our Carolina departure.

When John Grierson defined the documentary as the creative treatment of actuality in 1926, he was thinking only of film. But the documentary mode has long been utilized across media, from the late 19th century advocacy journalism of Jacob Riis to Craig Gilbert's 1973 reality television series An American Family to the selfies that circulate on social media. In this class, we will consider the persistence and pervasiveness of the documentary mode in the past century and a half. By surveying key developments in documentary film, and its historical, theoretical, and ethical implications, we will lay the groundwork for thinking critically about non-fiction media in its current, past, and future forms. Assignments include a series of short writing assignments, a take-home midterm, and a research-based final project.

Editing is not about adding or deleting text or inserting a comma or two; it's about working with a writer to communicate ideas to readers in the cleares							
most effective way possible. Editors and publishers seek not to change a work of fiction, poetry, or nonfiction into something they'd have written, but t							
help the work become the best version of itself. In this class, you'll learn the basics of literary editing and publishing, including acquisitions,							
developmental editing, copy editing, marketing, layout and book design, marketing, and digital curation and publication.

.This course surveys crucial developments in film theory from the 1920s to the present. We will begin by considering (and critiquing) the obsession with medium specificity that defines classical film theory and its various efforts to establish the artistic legitimacy of cinema. After comparing constructivist and realist approaches, we will focus on more contemporary trends that emphasize the embodied role of the viewer, such as affect theory and phenomenology. Mood, rhythm, and the multisensory impact of cinema will merit our attention, as will the politics of representation where race, gender, and sexuality are concerned. We will then explore two recent avenues: 1) arguments for the philosophical power of cinema, the claim being that films can think in their own right; and 2) the transformation of "film" in the digital age, and the merger of film theory with media theory. Our discussion of the digital afterlife of cinema will consider the significance of videogames.

Scottish Gaelic for Beginners

This course provides a fun and interactive introduction to the Scottish Gaelic language and its culture geared to complete beginners. By engaging in this modern, endangered and vibrant international minority language, students will develop and gain valuable skills in everyday conversation, reading, writing and listening. Students' learning will be enhanced by joining together in Gaelic song, storytelling and music from Scotland's Highlands to North Carolina's Sandhills and from Canada's Cape Breton Island to the Cape Fear.

ENGL 695: Health and Humanities: Intensive Research Practice

## Course Overview

In this project-centered course, you will learn about health humanities as an interdisciplinary field and try out different qualitative research techniques. Our class theme is Aging: what the writer Robin Morgan described as ¿a place of merciless poetry,¿ ¿fierce discipline,¿ and ¿quiet beauty.¿ Accordingly, course texts will include literary, artistic, and expressive works that address such topics as longevity, frailty, resilience, disability, community, solitude, mortality, and spirituality. We will also read more medically oriented materials drawn from anthropology, occupational therapy, geriatrics and the health sciences. Because this is a skills-based course, the reading assignments for ENGL 695 are relatively short (roughly 50 pp per week). Over the

This course is devoted to the study of narrative. It is a workshop, shaped by the interests and contributions of its members. Our focus is the long 19th century, which, in the past, has taken us from the early 18th century up into the 20th (reading British, American, and continental, or global prose fiction)--all based on participants' interests and needs. Together we will construct a canon that works for our group, and helps us see how others in the profession approach the genre. What has narrative theory been? Where is it headed? Past participants in our class have selected More, Goethe, Scott, Austen, the Brontes, Dickens, Gaskell, James, Woolf, and Conrad, among others, but the next group might choose entirely different writers instead, perhaps focusing on Imlay, Shelley, Stowe, Farrow, or Achebe, for instance.

Each member will choose a novel important to your work, as well as a key essay to supplement or contextualize it by placing it within a literary critical or narrative theory heritage (such as Aravamudan's critique of the category of the British novel "Fiction/Translation/Transnation"). Alternately, you may pair that novel with archival material discovered through your research, in UNC Special Collections or elsewhere. Once we have our working list of readings, the class will together choose several additional novels, in order to fill out our particular survey of narrative. In the past, other faculty have visited class

#### Twentieth-Century American Poetry and Poetics Beyond ¿The Lyric¿

This course seeks to familiarize students with crucial aspects of lyric theory while drawing on the study of twentieth-century American poetry to push beyond these more familiar assumptions. Ideas about ¿the lyric¿ have dominated modes of poetic inquiry for the last century, playing an influential role in New Criticism, Russian Formalism, Poststructuralism, the Frankfurt School, and other major theoretical movements. Generally, lyric presumes a model of individual poetic transmission, in which an ¿I¿ closely related to the poet expresses itself to a listening or overhearing ¿you,¿ which both is and is not the reader. The poem, meanwhile, has often been imagined as a kind of discrete textual container that can hold and convey some version of individual utterance. Poetry arguably has always been messier, more dispersive and relational, more varied, and less distillable to a single essential (and essentialist) form. American poets have long recognized and strained against lyric preconceptions, finding ways to express multiple identities, emotions that spread beyond the poem into surrounding media, communal voices not centered in a single individual, utterances that have no ¿voice¿ at all.

#### Horror and Science Fiction

What does it mean to take as our object of analysis, not a text as such but a genre? What does it mean to locate our literary critical practices around texts that are first and foremost understood to be representative not simply of themselves, the work of ¿literary fiction,¿ but of a ¿type¿ of writing, which is to say, a genre? What is ¿genre¿? Genre is a set of expectations, a way to categorize, a blueprint for writing, a strategy for the buying and selling of books, movies, and games, and at the very least a promise to deliver what one already knows and enjoys. What does an assumption of ¿genre¿ elucidate and what does it obscure? How does ¿genre¿ open up or curtail literary critical analysis? What do we know, or think that we know, when we categorize a work as belonging to a genre? We will read primary texts alongside theoretical accounts of genre. During the first half of our course, we will build our discussions around works of horror. During the second half, we will examine science fiction (or, more broadly, SF) as a critical category.

## PREREQUISITES:

First-year students only.

## DESCRIPTION:

Would you like to find out about the financial crisis of 2008? This seminar will discuss the reasons why the crisis happened, examine critically how the government responded to the crisis, and why it has been difficult for the economy to regain its pre-crisis momentum. We will also discuss the similarities between the Meltdown and other historical financial crisis. Students will gain a broader understanding of the global economy in which we live and work. In addition, the historical perspective will enable students to gain a more thorough appreciation of the challenges that lie ahead for their generation. The aim of the seminar is not to concentrate on facts but rather to comprehend the big picture of economic processes in their social and political context in a very long-run perspective. Lots of discussion, lots of audio visual material will make this an exciting way to start your college career.

ECON	101	006	1867	ECON: INTRO	Lecture (Face to Face Instruction)	3	A
<b>Bldg:</b> Hamilton Hall		<b>Room:</b> 0100	<b>Days:</b> MWF	<b>Time:</b> 09:05 - 09:55	INST	100	<b>Instructor:</b> Balaban, Rita Anne

ECON 101H.001 | Introduction to Economics

MWF, 2:30 pm - 3:20 pm; Recitation: M, 3:30 pm - 4:20 pm. Instructor(s): Kalina Staub. Enrollment = 25.

This is an introductory course in both microeconomics and macroeconomics for undergraduates. In this one-semester course students are introduced to the basic theory and models that economists use to analyze the world. The concepts introduced include: comparative advantage and the gains from trade; supply, demand, and the market system; the theory of the firm; market failures; national income and its determination; inflation and unemployment; monetary and fiscal policy; and foreign exchange fluctuations.

Class periods will consist of structured active learning activities, and a recitation section will be used to practice more in-depth problem solving.

Students will take two midterms and a final exam, will complete problem sets, online homework, and writing assignments. There are no prerequisites for the course; however, you are expected to have a strong grasp of basic algebra and geometry (plotting points, graphing lines, solving for x, calculating areas of shapes, etc.)

ECON 101H.002 | Introduction to Economics

TR, 9:30 am - 10:45 am; Recitation: F, 3:35 pm - 4:25 pm. Instructor(s): Martin Zelder. Enrollment = 25.

This course is an introduction to the study of economics. It has a number of goals: (1) to impart a basic understanding of how a market economy works; (2) to introduce students to the "economic way of thinking" about economic and social problems; (3) to prepare a student to take further courses in economics. Focuses include helping students apply the analytical tools they learn in the analysis of real world economic and social problems.

The course covers a wide range of topics including (1) the determinants of economic activity, (2) inflation, (3) unemployment, (4) operation of the price system, (4) monopoly and other forms of imperfect competition, (5) the impact of international trade, (6) the determinants of the distribution of income and wealth (7) the economics of the firm and (8) the economics of the household.

Class periods will consist of lecture and discussion format. A "recitation section" will be held for review and to explore additional topics."

Program: Honors Seminar on Entrepreneurship in Silicon Valley

Title: Emerging Technologies and Startup Practices

Dates: January 5-April 25, 2020

ECON 327H will examine current trends in emerging technologies, and on how companies in the Silicon Valley use startup principles in practice by taking advantage of the resources of the San Francisco Bay Area to give students a unique combination of experiential learning opportunities. The content of the course will include multiple site visits to companies in the Bay Area and a series of speakers, all of whom will bring real-world expertise to the classroom. The course will meet weekly for 3.5 hours.

Program: Honors Seminar on Entrepreneurship in Silicon Valley

Dates: January 5-April 25, 2020

The internship is central to the curriculum of the Minor in Entrepreneurship. Students in the seminar will work in their internships 30 hours per week for 12 weeks. Local coaches will assist students in networking and maximizing their internships.

Prerequisite: Econ 101  
This course is required for the Econ major.  
Help sessions will be available.

ECON 400H.001 | Elementary Statistics

Comprehensive introduction to statistics, including descriptive statistics and statistical graphics, probability theory, distributions, parameter estimation, hypothesis testing, simple and multiple regression, and use of powerful statistical estimation software.

Kevin Allen is an Assistant Teaching Professor and University Advisor in Economics. He received his PhD in Economics from the University of Kentucky, with a research focus on international trade and the impact of economic sanctions as a foreign policy tool.

ECON 511H.001 | Advanced Game Theory

TR, 9:30 am - 10:45 am. Instructor(s): Sergio Parreiras. Enrollment = 25.

The goal of this class is to provide tools for strategic thinking. The main part of the course deals with non-cooperative strategic models and their applications to industrial organization (e.g., oligopoly), political science (e.g., agenda setting), corporate finance (e.g., takeovers), biology (e.g., evolutionary equilibrium), behavioral economics (e.g., social preferences), etc... However, we will also study constrained optimization tools as well as many cooperative game theory applications (e.g., matching of hospitals and interns, kidney exchanges, etc...). Currently, ECON 411 (Game Theory) is not a pre-requisite. No advanced mathematics is used but some mathematical maturity (willingness to read mathematical proofs) is strongly recommended.

ENEC 201H.001 | Introduction to Environment and Society

MWF, 10:10 am - 11:00 am. Instructor(s): Greg Gangi. Enrollment = 18.

This course will explore changing human-environmental relations from a variety of social, geographical, and historical settings. While some lectures do include material from the natural sciences this is a social science class. The class cuts across a large number of disciplines in a manner that is integrative rather than segregating lessons from different academic disciplines into separate lectures. The focus of this course is in the first half of the class to give students familiarity with how humans and human organizations deal with issues of sustainability. The second half of the semester will explore some critical issues like population, food security, climate change, urban planning and transitioning to a low carbon economy. This part of the course will not only give student information important background information about the problems but also highlight possible solutions.

In addition, to weekly class lectures, students will attend a one-hour recitation session to enjoy small-group discussion and to explore related topics of

If you are unable to enroll online, submit a wait list request at <a href="http://honorscarolina.unc.edu/waitlist">honorscarolina.unc.edu/waitlist</a> between November 18 and January 2.</p> <p>ENEC 325H.001   Water Resource Management and Human Rights</p> <p>MWF, 1:25 pm - 2:15 pm. Instructor(s): Amy Cooke. Enrollment = 24.</p> <p>Water supply is a critical component of food and energy production, good health and sanitation. Yet globally, access to clean water is still not assured even within developed nations like the United States. Following the leadership of the UN Declaration of Human Rights, an increasing number of countries are adopting the position that access to water is a human right. What barriers to nations and individuals have to guaranteeing water access? Given the critical nature of water to good health and nearly all of human economic activity, what constraints do people have to negotiate globally to maintain sufficient stocks of this crucial resource for the earth's population?</p> <p>This course examines these questions. To do this we will use a variety of mediums: film, books, scientific research, lectures and discussions. We will endeavor to not only outline the constraints to and conflict over this increasingly limited resource, but also suggest some paths towards sustainable water.</p>

This Spring 2020 capstone class will explore environmental justice and well water in Northampton County and surrounding communities living near leaking coal ash landfills. In North Carolina, 25% of the population gets drinking water from private wells; the third largest percentage of private wells in the U.S. (USGS, 2014). Although the Safe Drinking Water Act (SDWA) regulates waterborne contaminants in municipal water systems, no tests are required in NC unless a new well is built. Unfortunately, less than seven percent of old wells were tested before 2010, and research shows many of those wells had concentrations of arsenic, cadmium, chromium, manganese, lead, and other contaminants exceeding SDWA standards (Sanders et al., 2011). Furthermore, the third largest coal

ash spill in the U.S. occurred in 2014 when Duke Energy spilled almost 82,000 tons of toxic ash into the Dan River (Duke 2014). Subsequently, the NC General Assembly provided free tests for all wells within a half-mile of any of the state's 14 power plants. Following the first round of well tests, over 350 residents of several communities were directed by state agencies not to consume their well water because of toxic metal contamination.

GR1								

Source water protection solutions have become increasingly important for water systems faced with challenges such as climate change, agricultural runoff, and urban development within their water supply watersheds. Students will examine how water systems of all sizes currently pay for source water protection, with a focus on innovative finance and policy-based solutions

GR1

All LFIT classes will meet in Fetzer Gym A for the first day of class. You will hear a brief overview of what to expect in LFIT this semester, and break out into our group.

\*You will not be doing any physical activity on the first day of class.

spaces have been reserved for first year students. The restrictions will be removed after first year students have registered.

Students may take only one, one-credit Lifetime Fitness (LFIT) course during their career at Carolina.

This course has an additional fee.

		17-NOV-2019	RC CLAS UG FFYS	STDTS	0		19

**PREREQUISITES:**

First-year students only.

**DESCRIPTION:**

This seminar focuses on understanding the physical geography of mountain environments and the processes that have created them, shaped them, and sustained them. There are several reasons for studying the environments of mountains: (a) they reveal integrative earth systems processes that can be readily observed and understood; (b) the processes are not oversimplified, but have spatial complexity at scales that can be methodically analyzed; and (c) mountains often reveal the intricate dynamics of coupled human-natural systems. We will explore mountain environments by concentrating on processes that shape the landscape, patterns that are apparent because of those active processes, and how the concept of scale (both through space and time) define the patterns that we observe when go on a hike or when we drive across the country. We will draw examples from different environments, including the Appalachian Mountains,

GEOG	56	001	10437	FYS LOCAL/GLOBAL WORLD	Lecture (Face to Face Instruction)	3	A

		17-NOV-2019	RC CLAS UG FFYS	STDTS	0		22

**PREREQUISITES:**

First-year students only.

**DESCRIPTION:**

Globalization is a word we hear every day, but what does it mean for us in local places? Specifically, what can an understanding of globalization tell us about Carolina and nearby places? This seminar weaves together perspectives on globalization with hands-on exploration of Carolina and its place in today's global knowledge economy, and the University's founding in relation to the globalizing forces of that day. Our focus will shift back and forth between the global and the local, even to the microscale of our campus. We will learn through a variety of experiences and approaches, including fieldwork, old documents, and some introductory GIS (geographic information systems) exercises in addition to readings, class discussion, and group work. By the end of the seminar, students will not only have an understanding of globalization and the very real connections between the global and the local, but also a unique

## PREREQUISITES:

First-year students only.

## DESCRIPTION:

This seminar explores how different meanings of nature help create the societies in which we live and evaluate the implications of efforts to transform and preserve Nature. Students will address conceptions and models of nature-society relations relevant to today's world, from resource extraction, to the transformation and movement of resources, to conservation. Through original research and discussions on ¿untouched¿ and ¿dirty¿ natures, students will develop informed perspectives on Nature's heterogeneity, and how this powerful idea matters to the organization and future of different societies. The readings and discussion will evaluate Western (especially American) conceptions of Nature and compare with other perspectives, including indigenous world views on ¿the good life,¿ to better understand questions of sovereignty, value and sustainable futures.

GR1

This course will focus on the formation and differentiation of the terrestrial objects in our solar system; including the Earth, Moon, Mars, Mercury, and Venus. Most of what we understand about the terrestrial planets/moons comes from research performed on samples of extraterrestrial material (meteorites and Apollo mission samples) and remote sensing by satellites and rovers of terrestrial objects. During this course we will explore formation and differentiation models for the different objects in our solar system with a focus on cosmochemical data from extraterrestrial material.

GLBL 401H.001 | Paradigms of Development and Social Change

R, 3:30 pm - 6:15 pm. Instructor(s): Michal Osterweil. Enrollment = 24.

This course aims to develop a critical perspective on development -- understood as a cultural logic and a discreet set of practices and policies -- so that we can better contribute to positive social change. Through course material and service learning, students develop an understanding of the relationship between development projects and emancipatory frameworks, domestically and globally.

Michal Osterweil is a Teaching Associate Professor in the Curriculum in Global Studies at UNC Chapel Hill. Her PhD is in Cultural Anthropology with a Certificate in Cultural Studies. Her courses and research focus on new paradigms of social change, in particular those emerging from various social

GLBL 486H.001 | Sports and Globalization

W, 2:30 pm - 5:00 pm. Instructor(s): Jonathan Weiler. Enrollment = 24.

This course explores some of the many interesting relationships between sports and globalization. We begin by discussing the emergence of modern sporting cultures globally as an outgrowth of the industrial revolution and the influence, imperial and otherwise, of British and later American cultural norms. The course will proceed thematically - exploring race, poverty, gender, nationalism and other issues related to tensions around globalization - and also topically, focusing on major events like the Olympics, World Cup and the spread of particular sports, notably soccer and baseball. In examining these themes and topics, we will be delving into sports as both important social and cultural practices in and of themselves and also keeping in mind the larger social, cultural and political forces shaping studies of globalization as those relate to sports. At all times, we'll be scrutinizing carefully the construction of the arguments presented in the readings, the evidence used, and the underlying premises - racial, gendered and otherwise - that might be informing and influencing the author's perspective.

The Chinese Nation as an Imagined Community

This course examines the formation of the Chinese {nation} by focusing on three regions that lie on the margins of the People's Republic of China: 1) Hong Kong (a Special Administrative Region); 2) Taiwan (a de facto independent entity despite the PRC's position that it is part of China); and 3) Xinjiang (an Autonomous Region). There has been considerable tension between each of these regions and the Beijing government over the last decades, a situation highlighted by the recent ongoing protests in Hong Kong.

Religion & Politics in Contemporary Russia.

As the rift with the West grows, religion is often used in Russia as an important identity marker to draw the line between {us} and {them}, to legitimate the actions of the political elite, to mobilize support and suppress dissent. By combining interdisciplinary approaches from political theory, sociology and law, this course will examine how religion and its public function in Russia is supported (and regulated) by the government, the clergy, and non-state and grassroots actors alike.

## PREREQUISITES:

First-year students only.

## DESCRIPTION:

This seminar focuses on five blockbuster pop novels about the distant past, from the time of early man (Clan of the Cave Bear) to the days of the conquistadors (Aztec). Each book tries to imagine how life might have been long ago. Do they get it right? We'll check the facts and see. After working in small teams that report orally on evidence relating to the time and place treated fictionally in one of the works being read, students engage in research on a topic of their choice culminating in a substantial final project.

## ABOUT THE INSTRUCTOR:

GSLI	60	001	13145	FYS: AVANT-GARDE CINEMA	Lecture (Face to Face Instruction)	3	A

		17-NOV-2019	RC CLAS UG FFYS	STDTS	0	23	

## PREREQUISITES:

First-year students only.

## DESCRIPTION:

Students explore the international history, filmic techniques and cultural meanings of non-narrative cinema of the 20th century. Students also transform in-class discussions and individual essays into video projects.

## ABOUT THE INSTRUCTOR:

Richard Langston joined the faculty at Carolina in the fall of 2002, was promoted to the rank of associate professor in 2008, and then became full professor in 2019. His research focuses generally on twentieth- and twenty-first century German literature and film. More specifically, he is interested in the

TITLE: Nature and Death: Ecological Crises in German Literature and Film

GEN EDS: LA, NA

## PREREQUISITES:

First-year students only.

## DESCRIPTION:

This seminar explores ecological crises and their depiction in German literature and film. We will focus on the central themes of nature and death. The texts and films we will discuss will range from early Romantic fairy tales to present-day documentaries and climate-change literature (cli-fi). We will

TITLE: We, Robots: Identifying with our Automated Others in Fiction and Film

GEN EDS: LA, BN

## PREREQUISITES:

First-year students only.

## DESCRIPTION:

The word ¿robot¿ was invented by Czech author Karel Capek in 1920. Robots were born out of fiction and continue to be coupled with fiction today. Film and television depict robots capable of deceit, diplomacy, labor, and love ¿ robots who have mastered and often surpassed the strange art of being human. Robots

RUSS 480H.001 | Russian-Soviet Jewish Culture: Lofty Dreams and Stark Realities

TR, 2:00 pm - 3:15 pm. Instructor(s): Stanislav Shvabrin. Enrollment = 15.

Sholom Aleichem's Tevye the Dairyman's daughter Chava elopes with a Russian man only to repent and return home looking for her father's forgiveness. Chava's escape from her family, however, represents a choice made by many Jews in the Russian Empire. JWST/RUSS 480 will focus on the real-life stories of those of Tevye's children who never went home while forming a prominent cultural force whose contribution left an indelible mark on the Soviet Union. JWST/RUSS 480 delves into the scintillating literary, visual, musical, and cinematic culture created by Jewish universalists seeking to build their new secular identity under the aegis of the Soviet Communist experiment in the aftermath of the 1917 Bolshevik coup d'états. Surveys the works of Isaac Babel, Eduard Bagritsky, Marc Chagall, Sergey Eisenstein, Ilya Ehrenburg, Vasily Grossman, El Lissitzky, Leo Lunts, Osip and Nadezhda Mandelshtam and others. Taught in English; some readings in Russian for qualified and honors students; films with English subtitles.

## PREREQUISITES:

First-year students only.

## DESCRIPTION:

In this interdisciplinary course, students will explore how scientists and humanists approach complex problems, and what happens when they work together to solve them. Team-taught by a cardiologist and a historian, this class will tackle several major questions: Why do people in rural areas of our state tend to face significant health challenges? What has changed about our state's health care system over the last fifty years, and how have those changes benefitted people or harmed them? How do attitudes, experiences, and stories passed down through generations in families and communities shape how people view their own health, interact with healthcare providers, and make choices about medical care? How do life histories and family stories shape doctors' medical choices and careers? What is the current state of our knowledge about cardiology and health inequalities? How can scientists and humanists work together to improve

HIST 072H.001 | Women's Voices: Twentieth Century European History in Female Memory

T, 3:35 pm - 6:05 pm. Instructor(s): Karen Hagemann. Enrollment = 24.

The seminar examines twentieth century European history through the lens of women's autobiographical writings. It explores women's voices from different generational, social and national backgrounds. We will read and discuss autobiographical texts by five women, who grew up in middle class families in Austria, Britain, France and Germany and wrote about their lives in the first half of the twentieth century. They all tried to make a difference in society and politics: Alice Salomon (1872-1948), a liberal Jewish-German social reformer and activist of the German middle class women's movement; Vera Brittain (1893-1970), a British volunteer nurse during World War I, who became after the war a peace activist and writer; Toni Sender (1888-1964), a German-Jewish socialist and one of the first female parliamentarians in Weimar Germany, who like Salomon after the Nazis takeover in 1933 had to flee Germany; Genevieve De Gaulle-Anthonioz (1920-2002), a French resistance fighter during World War II and a survivor of the women's concentration camp Ravensbrück; and Ruth Klüger (1931-), an Austrian-Jewish student who survived Auschwitz and became a professor in the U.S. The overarching theme of the seminar is the struggle of

TITLE: African American Music as History

GEN EDS: HS, US

PREREQUISITES:  
First-year students only.

DESCRIPTION:  
Over the course of the twentieth century, African Americans built new communities and moved about the country in search of opportunity and freedom. To explore these efforts we will concentrate on music. We will investigate how black people across time and space created and used music. During the semester

HIST 177H.001 | Ancient Travelers from Odysseus to Egeria

T, 3:30 pm - 6:00 pm. Instructor(s): Richard Talbert. Enrollment = 24.

The course is a seminar that offers an unusual opportunity to explore the multiple dimensions which travel brought to many people's lives and thinking throughout the Mediterranean and far beyond during classical antiquity. We give special attention to narratives, among them Homer's Odyssey, Virgil's Aeneid, Alexander's expedition in fact and imagination, St Paul's shipwreck. Guidebooks offer alternative perspectives: the anonymous trader's advice on Arabia, East Africa, India; the learned 'Baedeker' (Pausanias) on the cities and shrines of Greece at the height of Roman imperial rule. Different again in character, purpose and style, but also instructive, are maps and itineraries. Equally, we consider the distinctive outlook of the Christian pilgrim, especially Egeria's account of her journeys through the Bible Lands. We draw our findings together with reference to Lucian's witty science-fiction parody of the True History that even includes space travel. All texts are read in English translation. Participants' active engagement in discussion is vital to the success of this class. In addition to engaging with the readings that we all study, each participant researches a travel text or associated material and

HIST 179H.001 | Women in the History of UNC Chapel Hill

TR, 12:30 pm - 1:45 pm. Instructor(s): Katherine Turk. Enrollment = 24.

Women are the majority of undergraduate students at UNC-Chapel Hill; they have also made deep inroads into the university's faculty and administration. But the history of sex and gender relations on our campus has been contested and uneven since 1897, when a half-dozen female students first joined entering undergraduate classes of more than eight hundred. This course will explore the experiences of women students, faculty, faculty wives, and staff at the University of North Carolina at Chapel Hill as they were shaped by race, class and sexuality. The course will acquaint students with basic problems and concepts in 20th century women's history while focusing on the expansion of women's social, educational and professional opportunities. Its centerpiece will be our creation, together, of a major museum-quality exhibit that will open in Wilson Library in late spring 2020. The exhibit will draw heavily from the archival holdings at Wilson Library and oral histories collected by the Southern Oral History Program.

Program: Honors Semester in London  
 Course: The History of London 43 & 1666  
 Dates: January 18 - April 25, 2020

London is today well-known as a world city, a tourist destination, and, of course, a place to study, but it also has a rich and varied two-thousand-year history. This course offers you the chance to dovetail your time in London with an understanding and appreciation of the city's deep history and its roots in the past. We shall trace the first three quarters of London's history, focusing on such topics as the creation and growth of Roman Londinium, the emergence of medieval London and the lives of its inhabitants, the Great Plague of 1665, and the Great Fire a year after. An emphasis throughout will be on the evidence that grants us access to London's past. In light of how much London has changed in recent times, how can we reconstruct what it was like in centuries past? What was life like for Londoners, what were their material conditions, what sort of work did they do, what was their exposure to crime and

HIST 360H.001 | Modern American Intellectual History

TR, 12:30 pm - 1:45 pm. Instructor(s): Molly Worthen. Enrollment = 24.

This course explores questions and problems that have preoccupied idea-makers and shaped intellectual culture in late 19th and 20th-century America. Central themes include: the problem of defining American identity and mission in the world; the clash between faith and reason; solutions to social injustice; the tension between equality and freedom; the meaning of modernity; conceptions of human nature, truth, and even reality itself.

Molly Worthen is an associate professor in the Department of History. Her research focuses on North American religious and intellectual history, particularly the ideas and culture of conservative Christianity in the twentieth century. Her most recent book is *Apostles of Reason: The Crisis of Authority in American Evangelicalism*. She is also a contributing opinion writer for the New York Times.

This class is about the memory of the Holocaust. Using primary sources, specifically memoirs by Holocaust survivors, we will examine what it means for a text about the Holocaust to be both a historical document and a personal narrative. We will consider questions of evidence and truth; the relationship between experience, historical fact, and memory.

The class will be taught in a collaborative setting, which means that students will be focused on participation and engagement in classroom discussions. No writing assignments or exams.

History 398-001: Monuments, Commemoration, and Memory

In this seminar we will reflect on modern practices of commemoration since the early nineteenth century. We will investigate who has participated in memorializing the past in different societies around the world, what they have commemorated, and why commemoration has been contested in virtually every society. Students will have the opportunity to research the politics of memory in post-apartheid South Africa, imperial Germany, the American South, nineteenth century France, post-WWI Australia, contemporary Indonesia, or any other manifestation of commemoration that interests you. We will make full use of immersive mapping technologies and other resources to explore the diversity of commemorative practices in modern history.

HIST 398 sections are restricted to History majors until two weeks into the enrollment period.

At that time the restrictions will be removed and all students, regardless of major, will be able to enroll if there are seats available.

## HIST 398-002: Ancient Slavery

This course surveys ancient slavery in the mid-first millennium BCE, when slavery and the slave trade were widespread in Babylonia, Israel, and Greece. For each of these societies, there are three main topics: the role of slaves in the economy, the position of slaves in society, and attitudes towards slaves and slavery. Throughout the course, we shall seek for parallels among the three societies, while also noticing differences between ancient slavery and slavery in the US and the Caribbean in the 17th through 19th centuries. The aim of the course is to trace the roots of slavery to their known origins in the distant past, the better to understand why the effects of slavery still linger.

HIST 398 sections are restricted to History majors until two weeks into the enrollment period.

At that time the restrictions will be removed and all students, regardless of major, will be able to enroll if there are seats available.

## HIST 398-003: Environmental History in Global Perspective

This seminar in history is designed to provide students with the experience of planning and carrying out their own research projects and to open discussions on a variety of topics that are central to environmental history. Its main geographic focus begins in Latin America and extends to other world regions, including North America and South Asia. Environmental history is an emerging field with strong linkages to geography, ecology, and anthropology as well as to the interdisciplinary field of environmental studies. Environmental history helps us understand changes in the land as well as issues of survival, sustainability, conflict, and cooperation among different peoples, power brokers, and economic sectors in society. We shall explore the ecological and social consequences of drought, the problem of communal resource use and management in different historical settings, and the roots of environmental movements in the U.S. and other world regions.

HIST 398 sections are restricted to History majors until two weeks into the enrollment period.

## History 398-004: My Hometown

My Hometown will complete historical research projects based on topics related to their hometowns. Hometown here is loosely defined, and can range from a choice of childhood home, ancestral or adopted hometown, or current residence. This course will use the theme of the Hometown to introduce students to historical research methodologies by encouraging them to deeply investigate a site with which they are already deeply familiar and presumably interested.

HIST 398 sections are restricted to History majors until two weeks into the enrollment period.

At that time the restrictions will be removed and all students, regardless of major, will be able to enroll if there are seats available.

HIST 398-006: Before the War: Exploring the Antebellum South

Topics for this seminar include white and black society, slavery and resistance, gender and families, western expansion, religion, and politics. While not all topics may be covered in the course, students are encouraged to research in one of these areas. The core concept of the class is for students to work closely with the staff of the Southern Oral History Program and the North Carolina Collection in order to take advantage of these outstanding collections of published and unpublished material.

HIST 398 sections are restricted to History majors until two weeks into the enrollment period.

At that time the restrictions will be removed and all students, regardless of major, will be able to enroll if there are seats available.

HIST 398-007: UNC and Africa

How has Africa shaped the history of this campus from the antebellum era to the present? Over the semester, we will dig into university newspapers, yearbooks and archives as well as conduct oral history interviews in order to consider the sustained traffic in people and ideas between UNC and the African continent. Along the way, we will also think through other important questions, including: Who counts as an ¿African¿ when, and why? And what can the history of one university tell us about the United States and Africa more broadly? Students will produce a piece of original research related to the course

themes.

HIST 510H.001 | Human Rights in the Modern World

MW, 3:35 pm - 4:50 pm. Instructor(s): Michael Morgan. Enrollment = 24.

Today, the language of human rights is almost universal. It is fundamental to the way that we understand justice both at home and, especially, abroad. But this was not always the case. Ideas of human rights changed over time, gaining power as a result of political, intellectual, and social developments worldwide. This course looks at the international history of human rights from the Enlightenment to the present and considers how human rights ideas first emerged, how they evolved, and how they became so influential.

NO FIRST YEAR STUDENTS. IT IS RECOMMENDED FOR STUDENTS TO HAVE TAKEN AT LEAST ONE PRIOR HISTORY COURSE.

Michael Morgan specializes in modern international and global history. His first book, *The Final Act: The Helsinki Accords and the Transformation of the*

HIST 535H.001 | Women and Gender in African History

TR, 9:30 am - 10:45 am. Instructor(s): Emily Burrill. Enrollment = 24.

This course is designed for students interested in understanding and using gender as a lens for analyzing the African past. What does it mean to be a woman or a man, and how do these identities change in time and space? Is gender in Africa different from or the same as gender in other parts of the world? What is the relationship between gender and the body? What is the relationship between gender and authority? Who gets to write African gender history, and how? These are just a few of the core questions we will be exploring throughout the semester.

In this course, we are largely concerned with how and why histories are written or told. Certainly, through our interrogation of different ways of writing and telling history, we will learn quite a lot about the chronology of African history and issues of historical causation, not to mention certain key moments and events from the past. However, we are largely concerned with dismantling certain assumptions about the craft of history and the building of

HNRS 353.001 | The Cultural History of Food in China

TR, 11:00 am - 12:15 pm. Instructor(s): Michelle King. Enrollment = 24.

Whether your memories are comforting or exotic,tasting dumplings while held in your grandmother's lap, or trying egg drop soup for the first time in your neighborhood restaurant,it can be difficult to think about Chinese food as anything other than an experience to be savored. A historical approach, however, allows us to get a sense of how human relationships to food in China have changed dramatically over time, even as certain ideas about food continue to resonate. People the world over encounter Chinese culture for the first time through its food, but what exactly is it? How do we define its parameters, or explain its cultural, historical and social significance? In this course we will interrogate different ways in which to imagine, understand and define Chinese food. What ingredients or cooking methods constitute Chinese food? Which regions or geographical areas must be, should be, or could be included? What has been the role of food in traditional Chinese medicine? What are the agricultural roots of Chinese food; how has it been cultivated, grown and cooked? How have people celebrated food and drink, through poetry or nostalgic imagination? What about its excess and its lack, at imperial banquets or

HNRS 354.001 | The Elements of Politics II

MW, 3:35 pm - 4:50 pm. Instructor(s): Larry Goldberg. Enrollment = 24.

This course deals with the theme of the transition from ancient to modern understanding of the essence of politics and will concentrate on selected plays of Shakespeare that profoundly dramatize that transformation (Henry IV-Part I, Julius Caesar, King Lear, Macbeth and The Tempest). As the primary representatives of ancient thought, we shall read large portions of Aristotle's Nicomachean Ethics and Poetics. As the signal work in initiating modern thought, we shall read Machiavelli's Prince. This seminar will be conducted solely through conversation. Several essays, of varying length, will be required. There will also be an oral final examination. Students at all levels are welcome, and there are no prerequisites other than a willingness to read carefully and diligently.

INSTRUCTOR CONSENT REQUIRED. EMAIL DR. GOLDBERG AT lagoldbe@email.unc.edu).

HNRS 355.001 | Narrative and Medicine

M, 2:30-5PM. Instructor(s): Terry Holt. Enrollment = 24.

This seminar explores the role of narrative in medicine from two sides: the patient's experience of illness, and the experience of caring for the sick. As a writing workshop, this course offers students a supportive environment in which to explore their own experiences and refine their writing skills. It also provides an opportunity for service work in a variety of clinical settings, in which students will have a chance to participate in medical care. Taught by a clinician-writer with years of experience in medical care, professional publication, and workshop instruction, this course offers a rare opportunity to learn from a highly skilled professional engaged in the central concerns of his work.

3.0 CREDIT HOUR COURSE; FULFILLS LITERARY ARTS (LA) & EXPERIENTIAL EDUCATION (EE) REQUIREMENTS.

SPCL 400.301 | Issues and Innovation in Rural American Healthcare  
, . Instructor(s): Maryann Feldman. Enrollment = 15.  
Student Instructors: Aditi Adnikari

Course Description: This course will explore the Rural American healthcare context through the lens of public policy and business innovation. Though there are federal and state level policies in place to support rural health infrastructure, the private sector is often tasked with filling the gaps in American healthcare, and that is no different in a rural context. For example, even if makes food stamps available to rural populations, grocery stores must still be compelled to enter into rural markets to provide healthy food options. Thus, the public and private sectors work in tandem to address issues facing rural Americans.

SPCL 400.303 | Game Show Theory: How They Work, How to Win, and Why it Matters  
T, 6:00 pm - 8:00 pm. Instructor(s): Daniel Young. Enrollment = 15.  
Student Instructors: Justin Hadad

Course Description: When do you accept the banker's offer in ¿Deal or no Deal¿? How do you form alliances in ¿Survivor¿? When do you fold in ¿Blackjack¿?

The study of game shows lies at the intersection of two large academic fields: anthropology and mathematics. In this course we will peruse the anthropological deployment of game shows, the nature of which is often socially dependent and ritualistic. Anthropological study reveals the reliance game shows have upon continuity; and contrarily, how game shows fall apart when things don't go as planned.

SPCL 400.304 | "There Are No Facts": An Inquiry into Scientific Rationality  
, . Instructor(s): Cindy Current. Enrollment = 15.  
Student Instructors: Daniel Malowsky

Course Description: For Josef Mengele, Auschwitz constituted a scientific laboratory. In Nazi Germany, the study of biology was a political task and the political task was framed in the language of biology. An enlightened trajectory of scientific progress is a concept that needs to be abandoned, but surely science should not be. The task of rescuing science requires a critical inquiry into its limitations. In this course, we will investigate the complex dynamics between scientific thought, research, and politics. In order to develop a comprehensive framework to address this topic, which requires familiarity with the history and philosophy of science and political philosophy, we will read works by Paul Feyerabend, Michel Foucault, Judith Butler, and Hannah Arendt. Concurrently, we will examine primary source materials including journal articles, scientific texts, and other essays to motivate and enhance our

SPCL 400.306 | A Brief History of Western Economic Thought  
M, 5:00 pm - 7:00 pm. Instructor(s): Kalina Staub. Enrollment = 15.  
Student Instructors: Evelyn Morris

Course Description: Did economics start and end with Adam Smith? Was Marx a Classical economist? Where does the idea of a rational actor come from? As economics courses become more technical, the history of economic thought has been sidelined in university curricula, leading even economics PhD students to graduate without a basic understanding of the development of economic thought. This course attempts to address this gap by introducing students to the roots of the economic theory taught at UNC (in ECON 101, 410, and 420). Students who have wondered why we are taught what we are taught in economics and how economics became what it is today will begin to find answers in this class. We will learn to appraise the validity and soundness of economic arguments in their own context and question how economic thinkers are presented in contemporary economic arguments.

SPCL 400.307 | Conceptualizing Modern Governments: Political & Technological Systems in the 21st Century  
M, 4:00 pm - 6:00 pm. Instructor(s): Michael Tsin. Enrollment = 15.  
Student Instructor: Logan Pratico

Course Description: This course introduces students to the sociopolitical transitions in the 21st century that have occurred as a result of the technological revolution. Pulling from case studies in Asia, Eastern Europe and the United States, this course aims to address the current trends within the framework of the digital age. Does the internet make things more democratic? Do we have a right to privacy when all of our information exists for the world to see? With a focus on political censorship, social movements, digital governments, and rights to privacy this course aims to provide students with a deeper understanding of the all-encompassing nature of technology.

SPCL 400.308 | Inside the Mind of a Climate Denier, and Other Intersections of Climate Change & Psychology  
T, 4:00 pm - 6:00 pm. Instructor(s): Gabriela Valdivia. Enrollment = 15.  
Student Instructors: Megan Raisle & Lizzie Wilson

Course Description: Climate scientists have been sounding alarm bells about the idea of an anthropogenic warming of the global climate since the early 1970s. Despite many scientists' and supporters' best efforts, these warnings remained in relatively quiet circles of academia and policy for decades. In the last twenty years, climate dialogue has changed as the general public has begun to question uncharacteristic changes to their environments. Today, it is hard to go more than a week without reading about a drought, increasing severity of natural disasters, community resiliency, or, more recently, the Green New Deal, in popular headlines. This awakening of the public consciousness has often caused singular, politically-motivated dialogues to develop around discussions of climate in the United States. Yet, a changing climate permeates and complicates issues of environmental justice, our perceptions of the

TITLE: In the Flesh: The Constructed Body in Medieval and Renaissance Europe							
GEN EDS: HS, WB							
PREREQUISITES:							
First-year students only.							
DESCRIPTION:							
What are bodies? This may seem like a simple question to ask given that each of us has one. But the body you inhabit as you read this paragraph is more than a living system of flesh and blood; indeed, your body is as much a cultural, political and social symbol as it is a biological animal.

TITLE: THE IDEA OF RACE

COURSE DESCRIPTION: This course, taught by a biologist, a linguist, and an ethnomusicologist, focuses on the idea of "race." Historically, the idea that humans can be divided into distinct races has been a singularly pernicious one, having been used to justify the persecution, enslavement, and extermination of groups based on their presumed biological inferiority. Today, scientists agree that race is a false and distorting concept for understanding biological diversity among humans: what we describe as races are in fact social constructs, not genetic realities. Nonetheless, the idea of biological race persists in the popular imagination. In this course, students learn why race is not a viable human biological concept, how the idea of race arose historically (and continues to be maintained), and what alternative concepts exist for understanding human diversity and change over time.

TITLE: Understanding Health and Happiness

COURSE DESCRIPTION: This course will expose students to diverse approaches to studying topics related to happiness and subjective and physical well-being. The three professors will approach this topic from three disciplines: physiology; positive psychology; and sociology. An important aspect of the course is teaching students a variety of life skills, such as teamwork, developing social connections including "belongingness" at UNC, being physically active, and becoming confident that they can obtain the skills to increase their happiness and health.

<p>Experience and document North Carolina's Mexican and Latin American history. This course combines field research, oral history, and service learning to understand the immigration and settlement of North Carolinians with Mexican and Latin American heritage. The course will address the ethical and practical aspects of the ethnographic method including the preparation, transaction and transcription of oral history interviews. Students will participate in the New Roots Nuevas Raíces initiative and spend spring break (March 8-13, 2020) in Ocracoke, North Carolina, where they will collaborate with a local school to facilitate family heritage workshops. Students will also complete an independent research project and public presentation. The course is open to advanced undergraduates and graduate students. Required: 3 semesters of Spanish or ability to demonstrate Spanish language proficiency. Recommended: previous courses in Latin American or Latina/o/x studies, qualitative methods, or migration studies.</p>

## PREREQUISITES:

First-year students only.

## DESCRIPTION:

Students will examine evidence that human activity has caused global warming, investigate scientists' ability to predict climate change, and discuss the political and social dimensions of global climate change.

## ABOUT THE INSTRUCTOR:

Dr. Marc Alperin's work involves the use of stable isotopes as natural tracers of sedimentary processes. He is particularly interested in carbon cycling in coastal sediments and its role in the global carbon budget. Recent projects have included studies of the biogeochemistry of organic compounds dissolved in

NOTE: Honors Carolina students register online when their registration appointment begins. Non-honors students register beginning November 18. If you are unable to enroll online, submit a wait list request at [honorscarolina.unc.edu/waitlist](http://honorscarolina.unc.edu/waitlist) between November 18 and January 2.

MASC 057H.001 | Waves: From "The Sound of Music" to "The Perfect Storm"

TR, 9:30 am - 10:45 am. Instructor(s): Alberto Scotti. Enrollment = 24.

We are constantly surrounded by phenomena that are wave-like in nature. We communicate over short distances with sound waves, while we use electromagnetic waves over long distances. We see waves when we stand at beach, and the weather we experience is controlled very often by wave-like features of the jet stream. In this seminar, we will develop the conceptual framework necessary to understand waves, starting from laboratory observations. The main goal is to expose the common traits of waves, and how they can be used to enhance our understanding and predict the outcome of a broad range of important physical phenomena.

FIRST YEAR STUDENTS ONLY.

Please register for 3 credit hours. Class participants will improve their scientific writing skills by working with and discussing (among other resources) J. Schimel's "Writing Science: how to write papers that get cited and proposals that get funded", and through lots of practical writing practice. In accordance with class wishes, other types of scientific writing (e.g., job applications; reviews) will also be included.

TITLE: Mathematics of Voting

GEN EDS: QI

PREREQUISITES:

First-year students only.

DESCRIPTION:

What properties should a fair election have and are these properties achievable in theory and in practice? How can mathematics and statistics be used to expose election fraud and gerrymandering? What might voting systems look like if they were designed by mathematicians? Students will address these questions

TITLE: Unfolding Infinity: Mathematical Origami and Fractal Symmetry

GEN EDS: QI

PREREQUISITES:

First-year students only.

DESCRIPTION:

Have you ever wanted to be able to hold infinity in the palm of your hand? This course engages students in an exploration of the interplay between mathematics, origami, and fractal symmetry. Learning objectives will include mastering basic origami folding techniques, identifying and applying

NOTE: Honors Carolina students register online when their registration appointment begins. Non-honors students register beginning November 18. If you are unable to enroll online, submit a wait list request at [honorscarolina.unc.edu/waitlist](http://honorscarolina.unc.edu/waitlist) between November 18 and January 2.

MATH 233H.001 | Calculus of Functions of Several Variables

MWF, 10:10 am - 11:00 am; Recitation: T, 9:30 am - 10:20 am. Instructor(s): Thomas Beck. Enrollment = 24.

Level: This is the Honors section of MATH 233. It offers a more demanding and deeper treatment than the regular sections. For example, there will be more emphasis on understanding theory than in other sections. Topics: Vectors in three dimensional space. Dot products and cross products and their applications. Functions of two and three variables. Polar and spherical coordinates. Graphs and contours. Multivariable calculus: partial derivatives, gradient. Curves in space. Surfaces: normal vector, tangent plane. Maxima and minima. Lagrange multipliers. Double and triple definite integrals, line integrals, Green's theorem.

PREREQUISITE: AT LEAST A B+ IN MATH 232 AT UNC OR A 5 ON THE BC CALCULUS EXAM.

We are recruiting ULAs (Undergraduate Learning Assistants) for a variety of classes, including Math 110, 130, 231, 232, 233, and possibly 547. You will be able to take it as one-credit course or as a volunteer. It will involve helping out in the classroom as students work problems in groups and outside class mentoring or review sessions. If you take it for credit, there will be a reflective essay at the end required. In either case, there will be some training at the beginning of the semester and midway through (just a few hours). If interested, please reach out to Linda Green, greenl@email.unc.edu.

NOTE: Honors Carolina students register online when their registration appointment begins. Non-honors students register beginning November 18. If you are unable to enroll online, submit a wait list request at [honorscarolina.unc.edu/waitlist](http://honorscarolina.unc.edu/waitlist) between November 18 and January 2.

MATH 383H.001 | First Course Differential Equations  
MWF, 11:15 am - 12:05 pm. Instructor(s): Richard McLaughlin / Roberto Camassa. Enrollment = 24.  
methods of solution of first and second order differential equations , including the first order system  $X' = AX$ , where A is a 2 x 2 matrix ; linearization of nonlinear equations at a critical point ; examples and applications. Differential equations are an essential feature of any science, including economics.

PREREQUISITE: AT LEAST A B+ IN MATH 233 OR 233H AT UNC.

NO INSTRUCTOR BIO ON FILE

Dr. Camassa's research interests include Nonlinear Evolution Equations, Mathematical Modeling, Fluid Mechanics, Optics.

Prerequisites: Math 233 and Math 383.								
This course does NOT require permission of the instructor only the prerequisites of Math 233 and Math 383. Please disregard the description stating that instructor permission is required.								
This is a topics course that will focus on providing an introduction to the theory of relativity. In the process, time will be spent developing the necessary background in geometry to understand this theory. Topics shall include an overview of special relativity, an introduction to tensors, an introduction to the principles of general relativity and the field equations, topics on the energy-momentum tensor, and a derivation of and an overview of the properties of the Schwarzschild black hole solution. Supplemental topics will be explored at the discretion of the instructor.

The objectives of this course are to:

- Gain an understanding of the genomic data types being collected on human tumors
- Learn about the basics of RNA and DNA NGS sequence analysis
- Learn about pattern discovery tools including hierarchical clustering and biclustering
- Understand the challenges of integrating heterogeneous data types
- Learn real world examples of complex data integration for class discovery

Course expectations:

- Group project with hands-on analysis of genomics data

Topics covered include: transport properties of biological fluids and of particles in them, particle tracking experiments, fluorescence microscopy, particle tracking analysis, inferences from tracking data, MD simulations of particles in soft matter. There will be hands on modeling and analysis of experimental data and virtual simulated datasets to mimic experimental data and validate inferred properties from PT data. Student projects will be finalized by Class 3 or 4, then developed with 2 weeks between classes until final project presentations on Class 7. Projects can be individual or team.

Course meets Mondays Jan 13-March 9.

Class meets in PH 365.

This BD2K module is an introduction to Topological Data Analysis (TDA), with a focus on practical applications. As a tool, TDA has proven to be effective at quantifying topological and geometric structure in data, and has been used as a supplement to traditional clustering techniques. Moreover, advances in both computational power and algorithms for computing topological information make TDA more applicable than ever before. Again, the focus of this module will be on using TDA in practice and interpreting barcodes as describing intrinsic topological features of data sets.

Programming experience is not necessary.

Course meets January 29-March 19.

Class meets in PH 365.

The primary objectives of this course include:

- Gain an understanding of the basic concept and principles of pharmacokinetics
- Learn about the basics of pharmacokinetics and pharmacodynamics analysis
- Learn about the foundations of physiologically based pharmacokinetic models
- Understand the process and rules of building a physiologically based pharmacokinetic model for a variety of therapeutic modalities (small molecules, protein drugs, and nanoparticles)
- Hands-on analysis of pharmacokinetics and physiologically based pharmacokinetics
- 2-3 assignments for analyzing real world patient pharmacokinetic data
- Grading: In-class participation and homework assignments

Class meets at SAMSI, Research Triangle Park, NC.

This course is being offered in conjunction with the SAMSI year-long research Program on Games, Decisions, Risk and Reliability (GDRR). The course will cover topics in decision theory related to games and reliability, and often draw upon tools in machine learning. The topics include classical risk analysis, theoretical risk bounds obtained from Vapnik-Chervonenkis learning theory, a comparison of game theoretic and adversarial risk analysis perspectives in the context of strategic decisions among opponents, risk analysis in the context of cybersecurity and cyberinsurance, and models for the reliability of complex systems.

This course earns 3 credit hours for Spring 2019. When enrolling for this course, please select 3 credit hours.							
Instructor approval is NOT required for this course. Please disregard the ConnectCarolina description that says it is.							
Take-home and in-class activities, group discussion and problem-solving coaching will enhance student understanding of how chemistry, physics, materials science and biology are applied to engineering. There will be special focus on BioEngineering, Chemical, Mechanical and Environmental Engineering. Discussions of relevant scientific literature introduce each topic. Guest lecturers and faculty will provide perspectives in fields like mathematical modeling, mechanical engineering or circuit design so students gain a true interdisciplinary view of topics.

		17-NOV-2019	RC CLAS UG FFYS	STDTS	0		23

## PREREQUISITES:

First-year students only.

## DESCRIPTION:

This seminar is designed to offer students the tools and techniques for understanding multi-media, staged musical works like opera, musical theater, and film. The goal of the seminar is to develop students' analytical skills in verbal and non-verbal media and to encourage their visualization of the potential and implications of artistic forms and structures. No ability to read music is required. We will discuss musical, visual, and textual narratives, source materials, and the various means by which such multi-media artworks are transmitted to modern audiences (e.g., written scores, LPs/CDs, staged performances, movies, etc.). We will focus on music for silent films, and students will create their own soundtracks for silent film scenes.

TITLE: Songs of the Slave: The History of the African American Spiritual

GEN EDS: VP, US

## PREREQUISITES:

First-year students only.

## DESCRIPTION:

Born out of the oppressions of slavery, the spiritual is a folk song created by Africans forcibly brought to America and enslaved for 250 years. Spirituals were created through the combination of African melodies, rhythms, and performance practices with the influences of European Christian Hymnody. The Library

Focusing on the period following the 9/11 terrorist attacks, this course explores the U.S. government's use of hip hop as a form of public diplomacy, the interaction of citizens of different countries meant to establish dialogue, shape public opinion, and influence policy. At heart, this course is about the intersection of music and power. We will explore the power of music to bridge cultural divides, facilitate understanding, and build community. We will also seek to understand the fraught power relationships between art and the state and between the United States and the international community revealed in the practice of hip hop diplomacy. The course will follow my work as founding director of Next Level, a State Department-funded hip hop diplomacy program that has visited more than 30 countries since 2014 and will be conducting residencies during the

An exploration of UNC Chapel Hill's wonderful historical keyboard instrument collection through the study of music written for these very instruments between 1820 and 1860. Investigation of the historical and cultural context of music written during this era, as well as performance practice issues surrounding these instruments. Musical examples will include selected keyboard, vocal, and chamber works of Beethoven, Schubert, Chopin, Schumann, and others. No prior musical experience required. For keyboard players, string players, singers, and wind players, the class will involve a performance component.

NOTE: Honors Carolina students register online when their registration appointment begins. Non-honors students register beginning November 18. If you are unable to enroll online, submit a wait list request at [honorscarolina.unc.edu/waitlist](https://honorscarolina.unc.edu/waitlist) between November 18 and January 2.

MUSC 390H.001 | Music and Politics

TR, 3:30 pm - 4:45 pm. Instructor(s): Stefan Litwin. Enrollment = 24.

The principle of "l'art pour l'art" (art for art's sake) has dominated much of the way we hear and understand music. Since its emancipation from the church and courts, western music has been viewed mostly as an aesthetic island immune to the influences of political reality. This seminar will examine the interrelatedness between music and society, focusing mainly though not exclusively on composers who sought to address political issues through their music. Some of Ludwig van Beethoven's most popular works, for example, among them the 5th symphony, were inspired by the French Revolution; Franz Liszt championed an early form of Christian socialism; and composers throughout the 20th century reacted to political turmoil, war and revolution by inventing a variety of new musical styles and compositional methods. During the course of the semester, through readings and research projects, we will trace these developments and examine how politics helped define music. No prior musical knowledge or abilities are required.

First-year students only.

## DESCRIPTION:

Animals who grow up in the wild exhibit a great deal of individual variation in their appetites and aversions, and we can explain some of this variation by appeal to ontogenetic factors, some of it by appeal to environmental factors, and some by appeal to the interaction of these two factors. But humans who grow up in civilization exhibit an even wider range of individual psychological variation, and this wider variation can be explained only by appeal to a range of factors that have come to be known as ¿psychodynamic¿. In this course, we will study these psychodynamic factors. We will devote a little more than half of the semester reading Freud¿s lectures on psychoanalysis, and the rest of the semester to reading an overview of other psychodynamic theories of the mind, such as object relations theory and self psychology. We will develop our understanding of these various theories by applying them to the

PHIL 068H.001 | Moral Life

MW, 3:35 pm - 4:50 pm. Instructor(s): Douglas MacLean. Enrollment = 24.

Modern (post-Enlightenment) moral philosophy is primarily concerned with analyzing or defining moral concepts. This includes basic or ¿thin¿ concepts like good, bad, right, wrong, and ought; and it includes ¿thick¿ concepts that are more cognitively specific, such as kindness, cruelty, courage, cowardice, empathy, integrity, or selfishness. Thick concepts are often used to characterize moral virtues and vices.

Another aim of moral philosophy, which has been less pronounced in the modern era but was the central moral question in ancient times is: What is the proper or ideal life for a human being? How ought we to live? This seminar will focus on that ancient question, but it will draw heavily on modern philosophical works and concepts to help illuminate it.

We will begin with the Socrates, the first philosopher in the Western tradition to focus specifically on ethics, and then we will look briefly at other Greek philosophers, including Aristotle and the Stoic philosopher Epictetus. From there we move to more modern and contemporary philosophy, examining what

DESCRIPTION:							
Although we know that Copernicus and Galileo were correct in theorizing that the Earth orbits the Sun (rather than vice versa), it is less clear that the evidence they possessed for their theory was conclusive. The ways that Copernicus and Galileo argued for their theory reveal a great deal about how scientific theories are tested. In this seminar, we will examine their arguments in order to better understand the logic by which scientific theories are confirmed and, ultimately, justified. We will consider whether astronomy (and other sciences) can really discover that a theory not only accurately predicts our observations, but also accurately describes what we cannot see from where we are, with our naked eyes. We will think about whether the Catholic Church was justified at the time in regarding Copernicanism as merely one among many fairly successful techniques for predicting the night sky's appearance. We

This course requires a recitation section.

Some seats reserved for first-years and sophomores (with less than 60 credit hours earned) until November 15, 2019.

If you believe you are a first-year or sophomore and are getting an error message when trying to register, check your ConnectCarolina Student Center to see if you are being projected as a junior/senior for next term (due to 60+ credit hours earned). If you have 60+ credit hours earned, you may not be able to enroll at this time.

Please continue to check ConnectCarolina to see if an unrestricted seat opens or check back once the seat reservation is removed at the above-mentioned date. The seat reservations are only in place for a short while, so there will still be plenty of opportunity to try to get a seat in the class.

PHIL 160H.001 | Introduction to Ethics

MWF, 12:20 pm - 1:10 pm. Instructor(s): Simone Gubler. Enrollment = 24.

What is the good life? If I want to live well, should I pursue happiness, or should I seek some other way of being?

How should I act? Is moral practice about obeying rules, or generating good outcomes, or cultivating character?

We all face questions like these in our lives. In this class, we will tackle these questions; questions about we should live, and what we should do systematically. We will begin by familiarizing ourselves with the major theoretical traditions in ethics. Then, we will move to engage with recent debates over questions that both highlight differences among the competing ethical theories and provoke worries about their ability to account for the complexity of moral experience.

These questions include:

- What are we to do in situations in which it appears that a person ought to do one thing, and another thing, but cannot do both (call these, moral

If you are unable to enroll online, submit a wait list request at [honorscarolina.unc.edu/waitlist](https://honorscarolina.unc.edu/waitlist) between November 18 and January 2.

PHIL 224H.001 |

TR, 11:00 am - 12:15 pm. Instructor(s): Markus Kohl. Enrollment = 24.

A survey of European philosophers in the existentialist tradition. Topic to be discussed include: the question of whether our life has or lacks meaning; the relation between faith and reason; the significance of our finitude; the importance of human freedom; nihilism and absurdity; the connection between a meaningful life and a moral life; the possibility of combining existentialist and feminist commitments. Philosophers to be studied include chiefly Kierkegaard, Nietzsche, Dostoevski, Sartre, De Beauvoir, Camus.

Markus Kohl grew up in Germany before moving to England and then to the US. He studied philosophy and literature in Oxford, and obtained his PhD in

## PREREQUISITES:

First-year students only.

## DESCRIPTION:

The nanoworld is a strange and captivating place. It is a world of molecules vibrating trillions of times a second, quantum dots emitting rainbow colors, DNA encoding information in molecular bonds, and protein motors driving the complex machinery of the cell. At this scale, nature has unique rules and behaviors, some of which are amazing and unexpected. We are still uncovering these rules, and are only beginning to apply this new knowledge to technology. Can we build molecular machines that cure disease or clean up the environment? Can we make computers using single molecule transistors? How do viruses and other bio systems assemble themselves? In this seminar, we dive into the basic physics, chemistry and biology that describe the nanometer scale world. We will also try to distinguish the true promise of nanoscience from the hype. Students will engage in class discussions informed by their weekly reading of

TITLE: How Do We See?

GEN EDS: PH

## PREREQUISITES:

First-year students only.

## DESCRIPTION:

We will explore how we see in two senses. In the first, literal, sense we will explore the physics of vision and how it allows us to perceive the location and size of objects as well as their color. In the second, metaphorical, sense we will explore visual artifacts and how objects are represented in

TITLE: World's Fairs: Back to the Future!

GEN EDS: HS, CI, US

PREREQUISITES: First-year students only.

## DESCRIPTION:

This seminar uses U.S. World's Fairs, examples of constructed images of the modern city to investigate the changing image of 'America'. We selected six U.S. World's Fairs between 1893 and 1965 (1884 World Cotton Centennial, New Orleans; 1893 World's Columbian Exposition, Chicago; 1904 Louisiana Purchase Exposition, Saint Louis; 1939 New York World's Fair, New York City; 1962 Seattle World's Fair; 1964/1965 New York World's Fair, New York City). By examining
